1.1.1- Curricula developed and implemented have relevance to the local, national, regional and global developmental needs which are reflected in Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) of the various Programmes offered by the Institution.

The curricula developed have relevance to the regional/national/global developmental needs with well-defined learning objectives and outcomes at programme and course level. The department and the institute are guided and monitored in the preparation of course curriculum by two bodies, namely Board ofStudies and Academic Council and typically undergoes with the following: The Institute follows the guidelines issued by the regulatory bodies such as UGC, AICTE, affiliated university JNTUA, Anatapuram and Andhra Pradesh State Council of Higher Education (APSCHE) while designing the curricula. A series of all faculty meetings are conducted in correlation to the statedProgramme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs). The set of courses which require modifications (deletion/addition) are prepared and programme curricula adopted at other leading academic institutes in India and abroad are compared.

The Institute hosts reunion meets of Alumni. During such meets the institute takes the initiative of eliciting their views and suggestions in respect of required changes in curriculum. Several Memoranda of Understandings (MoUs) with local and national industries relevant to programs have been signed to make students acceptable at local, national and global level. In order to have right mix of curriculum, pedagogy and assessment to achieve the desired course and program outcomes, curriculum development and approval involves deliberations at various levels through relevant committees such as Department Advisory Board, Program Assessment Committee and Board of Studies.

For the effective design of curriculum structure feedback is collected from students, faculty, alumni, parents and employers. Also by conducting workshops, seminars and conferences periodically, faculties get an opportunity to interact with the academic and industrial experts which helps to design the curriculum more effectively. The recommendations of these committees are put up to Board of Studies with detailed programme structure, curricula and syllabi and further recommendations of BoS are put up for the approval of Academic Council.

The Institute introduced Choice Based Credit System (CBCS) and selflearning courses using MOOCs platform through SWAYAM, Coursera and some industry offered courses for undergraduate programmes and utilizes Learning Management System (LMS) for effective learning process. Value added courses to enhance communication, employability and entrepreneurship skills are included in the curriculum. Internship and live projects are also undertaken by students to enhance employability. The Institute established Centre for Innovation, andEntrepreneurship (CIIE) that helps in developing entrepreneurshipskills among the students through their interaction with successfulentrepreneurs and other related bodies. The Institute encourages thefaculty and students to work in emerging areas by involving localindustry. Curriculum revision is a continuous process with respectto elective and laboratory courses as per the need of the industryand regulatory bodies from time to time even though the normal cycleof revision is 3 years.

SRI VENKATESWARA COLLEGE OF ENGINEERING (Autonomous)

Karakambadi Road, Opposite LIC Training Centre, Tirupati – 517 507.

Accredited by NBA (B.Tech – CSE, ECE, EEE, Mech., Civil and IT) & NAAC with 'A' Grade Approved by AICTE, New Delhi permanently affiliated to JNTUA, Ananthapuram.

VISION OF THE DEPARTMENT

To impart knowledge with global perspectives in pursuit of excellence in Mechanical Engineering Education, Entrepreneurship and Innovation

MISSION OF THE DEPARTMENT

M1: To inculcate students with leadership skills with high level of integrity & ethical values for team building and team work

M2: To mold the young dynamic potential minds into full-fledged future professionals through effective teaching-learning techniques & industry – institute collaboration

M3: To serve the society through innovation and excellence in teaching and research

MEAD

DEPARTMENT OF MECHANICAL ENGINEERING
SV COLLEGE OF ENGINEERING
KARAKAMBADI ROAD, TIRUPATI - 517 507

SRI VENKATESWARA COLLEGE OF ENGINEERING (Autonomous)

Karakambadi Road, Opposite LIC Training Centre, Tirupati – 517 507.

Accredited by NBA (B.Tech – CSE, ECE, EEE, Mech., Civil and IT) & NAAC with 'A' Grade Approved by AICTE, New Delhi permanently affiliated to JNTUA, Ananthapuram.

PROGRAMME OUTCOMES (POs)

- **PO 1: Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- **PO 2: Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **PO 3: Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- **PO 4: Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- **PO 5: Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- **PO 6: The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- **PO** 7: Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- **PO 8: Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- **PO 9: Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **PO 10: Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive.

SRI VENKATESWARA COLLEGE OF ENGINEERING

(Autonomous)

Karakambadi Road, Opposite LIC Training Centre, Tirupati – 517 507.

Accredited by NBA (B.Tech – CSE, ECE, EEE, Mech., Civil and IT) & NAAC with 'A' Grade Approved by AICTE, New Delhi permanently affiliated to JNTUA, Ananthapuram.

PO 11: Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO 12: Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAMME EDUCATIONAL OBJECTIVES

PEO No.	Programme Educational Objectives
PEO1	Graduates can demonstrate technical competence in Mechanical Engineering
e n <u>B</u> all egs	domain as they apply problem solving skills to conceive, analyze, design and
	develop products, processes and systems.
PEO2	Graduates can actively embrace leadership roles and strive hard to achieve professional and organizational goals with adherence to professional and ethical values, team expectations and sensitivities of cultural diversity.
PEO3	Graduates are committed to practice engineering strategies in industry and government organizations to meet the growing expectations of the stake holders and also contribute to the societal development.

Program Specific Outcomes

- ❖ **PSO1:** Ability to apply the knowledge in Thermal Sciences, Design and Manufacturing processes towards the improvement of engineering systems considering productivity, quality and cost.
- * **PSO2:** Ability to analyze and apply the acquired Mechanical Engineering Knowledge for the sustainable growth of society and self.

R20 Course Outcomes - 2020- 2024 Batch				
S. No	Course Name	CO No.	Course Outcome	
		C111.1	Develop the use of matrix algebra techniques that is needed by engineers for practical applications. (L6)	
	C111	C111.2	Utilize mean value theorems to real life problems. (L3)	
1	Calculus (MA20ABS101)	C111.3	Familiarize with functions of several variables which are useful in optimization. (L3)	
		C111.4	Apply multiple integrals to find the area and volumes for different functions.(L3)	
		C111.5	Analyze the concepts of Beta and Gamma special function for different functions. (L4)	
		C112.1	Demonstrate the corrosion prevention methods and factors affecting corrosion. (L2)	
	C112 Engineering	C112.2	Explain the preparation, properties, and applications of thermoplastics & thermosetting, elastomers. (L2)	
2	Chemistry (CH20ABS101)	C112.3	Explain calorific values, octane number, refining of petroleum and cracking of oils. (L2)	
		C112.4	Explain the setting and hardening of the cement. (L2)	
		C112.5	Summarize the concepts of colloids, micelle and nanomaterials. (L2)	
		C113.1	Solve computational problems (L3).	
3	C113 Problem Solving	C113.2	Select the features of C language appropriate for solving a problem (L4)	
3	using C (CS20AES101)	C113.3	Design computer programs for real world problems (L6)	
		C113.4	Organize the data which is more appropriated for solving a problem (L6)	
		C114.1	Apply concepts of KVL/KCL in solving DC circuits	
		C114.2	Illustrate working principles and operation of DC and AC Machines	
	C114 Basic Electrical & Electronics	C114.3	Describe working principles of various power systems and distribution systems	
4	Engineering (EE20AES101)	C114.4	Explain the theory, construction, and operation of electronic devices	
		C114.5	Analyze the applications of various Electronic Devices	
		C114.6	Explain the working of Op Amp and its applications based on Op-Amps	

	~		
		C115.1	Identify tools, work material, measuring instruments useful for domestic applications (L3).
		C115.2	Apply wood working skills in real world applications. (L3)
		C115.3	Build different parts with metal sheets in real world applications. (L3)
		C115.4	Apply fitting operations in various applications for good strength. (L3)
_	C115 Engineering	C115.5	Analyze different types of basic electric circuit connections. (L4)
5	Workshop (ME20AES101)	C115.6	Demonstrate soldering and brazing in joining circuits. (L2)
		C115.7	Make moulds for sand casting using standard equipment. (L3)
		C115.8	Develop different weld joints for various metals. (L3)
	11,244 2	C115.9	Inspect various parts of machine components. (L4)
		C115.10	Make plastic components using proper raw material. (L3)
		C116.1	Identify the Internal parts of computers and Generation of Computers. (L1)
	C116 IT Workshop (CS20AES103)	C116.2	Assemble and disassemble a computer from its parts and prepare the computer ready to use.(L3)
		C116.3	Installation process of different types Operating system for a computer by their own.(L3)
6		C116.4	Interconnect two or more computers for information sharing.(L4)
		C116.5	Access the Internet and browse it for required information.(L1)
		C116.6	Prepare the documents using Word Processor, prepare spread sheets for calculations using Excel, and documents for LaTeX.(L3)
		C116.7	Prepare slide presentation using the presentation tool.(L4)
		C117.1	Determine the moisture content in the coal sample. (L3)
	C117	C117.2	Prepare advanced polymer materials. (L2)
7	Engineering Chemistry Lab (CH20ABS102)	C117.3	Determine the physical properties like adsorption and viscosity. (L3)
	,,	C117.4	Estimate Iron in cement. (L3)
		C117.5	Calculate the hardness of water and dissolved oxygen. (L4)
		C118.1	Build algorithm and flowchart for simple problems.
	C118	C118.2	Use suitable control structures to solve problems.
			•

8	Problem Solving using C Lab	C118.3	Use suitable iterative statements, arrays and modular programming to solve the problems.
	(CS20AES102)	C118.4	Implement Programs using pointers and String handling Functions.
		C118.5	Develop code for complex applications using structures, unions and file handling features
		C119.1	Verify Kirchoff's Laws & Superposition theorem. (L3)
		C119.2	Perform testing on AC and DC Machines. (L5)
	C119	C119.3	Study I – V Characteristics of PV Cell. (L2)
9	Basic Electrical & Electronics Engineering Lab	C119.4	Learn the characteristics of basic electronic devices like PN junction diode, Zener diode & BJT.
	(EE20AES102)	C119.5	Construct the given circuit in the lab.
		C119.6	Analyze the application of diode as rectifiers, clippers and clampers and other circuits.
		C119.7	Design simple electronic circuits and verify its functioning
		C121.1	Solve the differential equations related to various engineering fields. (L6)
	C121	C121.2	Solve the linear differential equations of higher order related to various engineering fields. (L6)
10	Differential Equations and Vector Calculus	C121.3	Identify solution methods for partial differential equations that model physical processes. (L3)
	(MA20ABS201)	C121.4	Interpret the physical meaning of different operators such as gradient, curl and divergence. (L5)
	,	CÌ21.5	Estimate the work done against a field, circulation and flux using vector calculus. (L5)
		C122.1	Apply the different realms of physics and their applications in both scientific and technological systems through physical optics. (L3)
		C122.2	Understand the mechanisms of emission of light, the use of lasers as light sources for low and high energy applications. (L2)
11	C122 Engineering Physics (PH20ABS101)	C122.3	Understands the response of dielectric and magnetic materials to the applied electric and magnetic fields. (L2)
		C122.4	Explain the basic concepts of acoustics and ultrasonic's. (L2)
	:	C122.5	Apply the important properties of crystals like the presence of long-range order, periodicity and structure determination using X-ray diffraction technique. (L3).
		C123.1	Understand the context, topic, and pieces of specific information from social or transactional dialogues spoken by native speakers of English. (L2)
	C123	C123.2	Apply grammatical structures to formulate sentences and correct word forms. (L3)
12	Communicative English (EG20AHS101)	C123.3	Analyze discourse markers to speak clearly on a specific topic in informal discussions. (L4)
	(2020/110101)	C123.4	Evaluate reading/listening texts and to write summaries based on global comprehension of these texts. (L5)
		C123.5	Create a coherent paragraph interpreting a figure/graph/chart/table. (L6)

.

			T
	GIAL	C124.1	Explain the principles of binary phases. (L2)
		C124.2	Select steels and cast irons for a given application. (L3)
13	C124 Material Science & Engineering	C124.3	Apply heat treatment to different applications. (L3)
	(ME20AES201)	C124.4	Explain the Application of non-ferrous metals and alloys in engineering. (L2)
		C124.5	Explain the properties of composites, super alloys and nano-scale materials with their applications. (L2)
		C125.1	Draw basic geometrical constructions, curves used in engineering practices. (L1)
	G105	C125.2	Understand the concept of projection and acquire visualization skills, projection of points, Lines and Planes. (L2)
14	C125 Engineering Drawing	C125.3	Illustrate the projections of solids graphically. (L3)
	(ME20AES102)	C125.4	Draw and explore the sectional views of right regular solids.(L3)
		C125.5	Draw the development of surfaces of solids. (L3)
		C126.1	Draw the basic views related to projections of Lines, Planes. (L1)
	Clar	C126.2	Draw the basic views related to projections of Planes. (L1)
15	C126 Engineering Graphics Lab (ME20AES103)	C126.3	Illustrate orthographic views of simple objects. (L3)
		C126.4	Illustrate isometric projections of simple solids. (L3)
		C126.5	Interpret and comprehend with drafting packages for engineering practice. (L2)
		C127.1	Develop to handle and excel in a variety of self-instructional, learner-friendly modes of language learning. (L6)
	Class	C127.2	Develop to employ better stress and intonation patterns and utter English sounds correctly. (L6)
16	C127 Communicative English Lab	C127.3	Develop to avoid the impact of mother tongue in English and neutralize their accent. (L6)
	(EG20AHS102)	C127.4	Develop to participate with skill and confidence in Group Discussions, Interviews and Public Speaking. (L6)
		C127.5	Utilize the technical skills to prepare resume, report-writing, and format-making etc. (L3)
		C128.1	Utilize various optical instruments. (L3)
		C128.2	Estimate wavelength of laser and particles size using laser. (L5)
	C128	C128.3	Evaluate the acceptance angle of an optical fiber and numerical aperture. (L5)
17	Engineering Physics Lab (PH20ABS102)	C128.4	Estimate the susceptibility and related magnetic parameters of magnetic materials. (L5)
		C128.5	Organize the intensity of the magnetic field of circular coil carrying current with distance. (L3)

		C128.6	Determine magnetic susceptibility of the material and its losses by B-H curve. (L5)
		C128.7	Apply the concepts of ultrasonics by acoustic grating. (L3)
		C129.1	Differentiate various microstructures of ferrous and non-ferrous metals and alloys. (L4)
	C129	C129.2	Identify grains and grain boundaries. (L1)
18	Material Science & Engineering Lab	C129.3	Explain Importance of hardening of steels. (L4)
	(ME20AES202)	C129.4	Evaluate hardness of treated and untreated steels. (L4)
		C129.5	Differentiate hardness of super alloys, ceramics and polymeric materials. (L4)
		C1210.1	Understanding the value of education to become more aware of themselves, and their surroundings (family, society, nature). (L2)
	C1210	C1210.2	Utilize the concepts of human being-harmony in myself become more responsible in life, and in handling problems with sustainable solutions, while keeping human relationships and human nature in mind. (L3)
19	Universal Human Values	C1210.3	Understanding the concepts of society-harmony in human for better critical ability. (L2)
	(BA20AMC201)	C1210.4	Understanding the human values, human relationship and human society to become sensitive to their commitment. (L2)
		C1210.5	Apply what they have learnt to their own self in different day-to-day settings in real life, at least a beginning would be made in this direction. (L3)
	-	C1211.1	Understanding the value of education to become more aware of themselves, and their surroundings (family, society, nature). (L2)
	C1211	C1211.2	Utilize the concepts of human being-harmony in myself become more responsible in life, and in handling problems with sustainable solutions, while keeping human relationships and human nature in mind. (L3)
20	Universal Human Values	C1211.3	Understanding the concepts of society-harmony in human for better critical ability. (L2)
	(*BA20AHS201)	C1211.4	Understanding the human values, human relationship and human society to become sensitive to their commitment. (L2)
		C1211.5	Apply what they have learnt to their own self in different day-to-day settings in real life, at least a beginning would be made in this direction. (L3)
		C1212.1	Demonstrate knowledge basic mathematics to develop analytical skills to solving problems of Averages - Percentages - Ratio. (L2)
	C1212	C1212.2	Demonstrate knowledge basic mathematics to develop analytical skills to solving problems of Partnership - Simple Interest and Compound Interest and time and distance. (L2)
21	logicla skills for professionals	C1212.3	Demonstrate knowledge basic mathematics to develop analytical skills to solving problems of time ad work, problems on trains and Boats and streams. (L2)
	(MA20AMC101)	C1212.4	Analyze the techniques in series, coding and decoding and blood relations. (L3)
		C1212.5	Analyze the techniques in directions, problems on ages and analogy. (L3)
		C211.1	Apply Cauchy-Riemann Equations to find the Analyticity of Complex Functions. (L3)
	C211 Complex Variables,	C211.2	Apply Cauchy's Integral Formula and Cauchy's Integral Theorem to Evaluate Improper Integrals along Contours. (L3)
22	Transforms & Application of Partial Differential	C211.3	Analyze the Concepts of Laplace Transforms to Solve Ordinary Differential Equations. (L4)

To be a few to the second

	Equations (MA20ABS301)	C211.4	Examine the Fourier Series for Different Functions in Half and Full Range. (L4)
		C211.5	Solve One-Dimensional Wave Equation Heat Equation and Laplace Equations by Applying Fourier Series. (L3)
		C212.1	Classify the forces and stresses involved in plane and rigid bodies (L2)
		C212.2	Analyze the equilibrium of forces in static particles and rigid bodies. (L4)
23	C212 Mechanics of	C212.3	Apply the concepts of stress and strain to machine and structural members. (L3)
25	Materials (ME20AES301)	C212.4	Determine centroid for simple sections and construct the shear force and bending moment diagrams for beams. (L4)
		C212.5	Calculate slope and deflection in beams under different loading conditions and distinguish the strengths of solid and hollow shafts. (L4)
		C212.6	Analyze columns for buckling loads and estimate stresses in thin cylinders due to internal pressure. (L4)
		C213.1	Describe the Concepts of Continuum, System, Control Volume, Thermodynamic Properties, Thermodynamic Equilibrium, Work and Heat. (L2)
	C213	C213.2	Evaluate the Laws of Thermodynamics System to Analyze Boilers, Heat Pumps, Refrigerator, Heat Engines, Compressors and Nozzles. (L3)
24	Engineecing Thermodynamics (ME20APC301)	C213.3	Examine the Change in Entropy of the System, available Energy and Irreversibility. (L3)
	(MEZUAI CSUI)	C213.4	Evaluate the Performance of Pure Substance and Thermodynamic Relations. (L3)
		C213.5	Analyze Air Standard Cycles Applied in Prime Movers. (L3)
	C214 Manufacturing Processes (ME20APC302)	C214.1	Demonstrate Different Metal Casting Processes and Gating Systems. (L2)
		C214.2	Classify Working of Various Welding Processes. (L2)
25		C214.3	Evaluate the Forces and Power Requirements in Rolling Process. (L5)
		C214.4	Apply the Principles of Various Forging Operations in industrial applications. (L3)
		C214.5	Illustrate the Manufacturing Methods of Plastics, Ceramics and Powder Metallurgy. (L2)
		C214.6	Identify Different Composites Parts and Surface heat Treatment Process. (L3)
		C215.1	Understand the Basic principles Involved in Mechanisms to Produce motion from one point to other point with help of Links, Pairs and Joints. (L2)
	*	C215.2	Apply Kinematic Analysis to achieve Simple Mechanisms. (L3)
26	C215 Kinematics of	C215.3	Analyze Velocity and Acceleration in Mechanisms by Vector and Graphical Method. (L4)
	Machinery (ME20APC303)	C215.4	Synthesize a Four-Bar Mechanism with Analytical and Graphical Methods. (L3)
		C215.5	Apply Fundamentals of Gear Theory as a Prerequisite for Gear Design. (L3)
		C215.6	Construct Cam Profile for Given Follower Motion. (L3)

	C216	C216.1	Estimate the Tensile Strength of the given sample by performing Tension Test (L4)
		C216.2	Calculate the Bending Strength of Simply Supported Beam and Cantilever Beam by performing Bending Test(L3)
27	Mechanics of Materials Lab	C216.3	Evaluate the Torsional Stress for Circular Shafts by means of Torsion Test (L4)
	(ME20AES302)	C216.4	Evaluate the Hardness Value by means of Brinell Hardness and Rockwell Hardness Tests for Different Specimens (L4)
		C216.5	Estimate the Strength of Open and Closed Coil Helical Spring by Spring Test(L4)
		C217.1	Identify the Tools Used in Metal Casting. (L2)
	C217	C217.2	Evaluate Mechanical Components using Metal Casting Techniques. (L3)
28	Manufacturing Process Lab	C217.3	Analyze Different Welding Techniques for Various Mechanical Components. (L3)
	(ME20APC304)	C217.4	Fabricate Forging Components using Press Working Operations. (L5)
		C217.5	Apply Injection, Blow Molding and Hand layup Process Techniques for Fabricating Different Composite Components. (L4)
		C218.1	Identify Different Types of Links and Pairs in Mechanisms. (L1)
29	C218 Mechanics of	C218.2	Apply Relative and Instantaneous Centre of Rotation Method for Different Mechanisms. (L3)
29	Machines Lab (Virtual Lab) (ME20APC305)	C218.3	Analyze various motions produced by Mechanisms. (L4)
		C218.4	Analyze Various CAM Profile Motions. (L4)
		C219.1	Memorize Various Elements of Effective Communicative Skills.
		C219.2	Interpret People at the Emotional Level Through Emotional Intelligence.
	C219	C219.3	Apply Critical Thinking Skills in Problem Solving.
30	Soft Skills (EG20ASC301)	C219.4	Analyze the Needs of an Organization for Team Building.
		C219.5	Judge the Situation and take Necessary Decisions as a Leader.
		C219.6	Develop Social and Work-Life Skills as Well as Personal and Emotional Well-Being.
		C2110.1	Understanding multidisciplinary nature of environmental studies and various renewable and nonrenewable resources. (L2)
		C2110.2	Understand flow and bio-geo- chemical cycles and ecological pyramids. (L2)
31	C2110 Environmental Science	C2110.3	Understand various causes of pollution and solid waste management and related preventive measures. (L2)
	(CH20AMC201)	C2110.4	Apply the rainwater harvesting, watershed management, ozone layer depletion and waste land reclamation. (L3)
		C2110.5	Apply the concepts of population explosion, value education and welfare programmes in society. (L3)

		021111	II. F. List I Lad
	C2111	C2111.1	Use English language, both written and spoken, competently and correctly.
		C2111.2	Improve comprehension and fluency of speech.
32	Enhancing English Language Skills	C2111.3	Hone the communication skills to meet the challenges of their careers successfully.
	(EG20AMC301)	C2111.4	Gain confidence in using English in verbal situations.
		C2111.5	Strengthen communication skills in different contexts like formal and informal.
		C2112.1	Understanding the value of education to become more aware of themselves, and their surroundings (family, society, nature). (L2)
	62112	C2112.2	Utilize the concepts of human being-harmony in myself become more responsible in life, and in handling problems with sustainable solutions, while keeping human relationships and human nature in mind. (L3)
33	C2112 Universal Human Values	C2112.3	Understanding the concepts of society-harmony in human for better critical ability. (L2)
٥	(*BA20AHS201)	C2112.4	Understanding the human values, human relationship and human society to become sensitive to their commitment. (L2)
		C2112.5	Apply what they have learnt to their own self in different day-to-day settings in real life, at least a beginning would be made in this direction. (L3)
		C221.1	Apply Different Methods to Find Roots of Algebraic and Transcendental Equations. (L3)
	C221 Numerical	C221.2	Apply Different Methods to Find Approximate Solution of Ordinary Differential Equations and Numerical Integration. (L3)
34	Methods, Probability and Statistics (MA20ABS401)	C221.3	Analyse the Concepts of Probability and their Applications. (L4)
		C221.4	Apply Discrete and Continuous Probability Distributions in Practical Problems. (L3)
		C221.5	Analyse the Statistical Inferential Methods Based on Small and Large Sampling Tests. (L4)
		C222.1	Understand the Basic Principles Involved Friction, Precession, Balancing and Vibrations. (L2)
	C222	C222.2	Determine Power Loss and Power Transmitted Due to Friction in Various Applications. (L3)
35	Dynamics of Machinery	C222.3	Apply Balancing Principles for Various Rotating and Reciprocating Masses. (L3)
	(ME20APC401)	C222.4	Analyze the Magnitude of Vibration and Isolate Vibration of Dynamic Systems. (L4)
		C222.5	Determine the dimensions of Governors for Speed Control in mechanical devices. (L3)
		C223.1	Understand the cutting principles involved in various Machining Process. (L2)
	C223	C223.2	Illustrate the working principles of various Machine tools. (L2)
36	Machine Tools & Measurements (ME20APC402)	C223.3	Evaluate the machining time and tool life for the various machining processes (L4)
	(MEZUAPC402)	C223.4	Classify various measuring instruments used in metrology(L2)
,		C223.5	Validate various measuring instruments in Engineering Applications. (L4)

		C224.1	Explain the Basic priciples of I.C Engines and Combustion in S.I and C.I Engines. (L2)
		C224.2	Describe the Significance of Fuel Supply, Cooling, Lubrication and Ignition Systems. (L2)
37	C224 Thermal Engineering – I	C224.3	Illustrate the Combustion Phenomenon in CI Engines and SI Engines, Types of Combustion Chambers, Knocking. (L2)
	(ME20APC403)	C224.4	Solve the Numerical Problems on Performance Parameters of I.C Engines. (L3)
		C224.5	Solve the Numerical Problems on Air Compressors. (L3)
	-	C225.1	Discuss the Types of Business Environment, its Scope and its Analysis along with Characteristics of Business.
	C225	C225.2	Explain the Effects of Government Policy on the Economic Environment and Insurance Industry
38	BUSINESS ENVIRONMENT	C225.3	how Society and Cultural Environment Impacts on Business Environment.
	(BA20AHS302)	C225.4	Describe how Political Environment is Utilized in Business.
		C225.5	Explain the Natural and Technological Framework that Regulates Business
		C226.1	Demonstrate the Conventional Representations of Materials and Machine Components. (L2)
	6226	C226.2	Understand Various Types of Fasteners Used for Permanent and Temporary Joints like Screw, Bolt and Rivet etc. (L2)
39	C226 Computer Aided Machine Drawing	C226.3	Develop Solid Models of Machine Parts and Assemble them by using CAD Software. (L3)
	(ME20APC404)	C226.4	Translate 3D Assemblies into 2D Drawings by using CAD Software. (L2)
		C226.5	Create Manufacturing Drawing with Dimensional and Geometric Tolerances. (L4)
		C227.1	Draw the Diagram of Port/Valve Timing and Functioning of an I.C Engines. (L2)
	C225	C227.2	Evaluate the Performance Characteristics of I.C Engine at Different Loads and Draw the Heat Balance Sheet. (L3)
40	C227 Thermal Engineering Lab	C227.3	Evaluate the Performance Test on Reciprocating Air Compressor. (L3)
	(ME20APC405)	C227.4	Illustrate the Working principle of Refrigeration System. (L4)
	s	C227.5	Identify the Various Components of Babcock, Wilcox and Lancashire Boilers. (L2)
		C228.1	Illustrate a experimental model with Step turning, taper turning and thread cutting on lathe machine (L4)
	C228	C228.2	Demonstrate working principles of drilling and tapping process using drilling machine and Practice a experimental model using the principles of operations in practical on shaper, slotter, planer and milling (L3)
41	Machine Tools & Measurements Lab	C228.3	Adapt the working principles of grinding of tool angles, cylindrical grinding and surface grinding process (L3)
	(ME20APC406)	C228.4	Demonstrate work in quality control departments of industries and to ensure quality of products (L3)
		C228.5	Apply the principles in instruments and measuring techniques (L3)

and an electrical

		C229.1	Analyze the problems using asymptotic notations.(L4)
	C229	C229.2	Apply Stack, Queues and linked list to solve different applications.(L3)
42 A	Real-Time Application of Data Structures	C229.3	Demonstrate suitable sorting techniques for the real world problem.(L4)
	(CS20ASC301)	C229.4	Implement tree structures in different patterns of representation of data.(L3)
		C229.5	Analyze the given problem using graph traversal techniques.(L4)
		C2210.1	Explain the Fundamentals of Design Thinking and Innovation.
	C2210	C2210.2	Apply the Design Thinking Techniques for Solving Problems in Various Sectors.
43 D	C2210 Design Thinking for Innovation	C2210.3	Analyze Work in a Multidisciplinary Environment.
	(ME20AMC401)	C2210.4	Evaluate the Value of Creativity.
		C2210.5	Formulate Specific Problem Statements of Real Time Issues.
		C2211.1	Develop the use of matrix algebra techniques that is needed by engineers for practical applications (L6)
	C2211	C2211.2	Utilize mean value theorems to real life problems (L3)
44	Engineering Mathematics (MA20AMC401)	C2211.3	Solve the differential equations related to various engineering fields (L6)
		C2211.4	Apply multiple integrals to find the area and volumes for different functions. (L3)
		C2211.5	Estimate the work done against a field, circulation and flux using vector calculus (L6)
		C2212.1	Demonstrate Knowledge Basic Mathematics to Develop Analytical Skills to Solving Problems of HCF, LCM Factors and Simplification.
	C2212	C2212.2	Demonstrate Knowledge Basic Mathematics to Develop Analytical Skills to Solving Problems of Pipes, Alligation or Mixture.
45	Logical Skills for Professional – II	C2212.3	Demonstrate Knowledge Basic Mathematics to Develop Analytical Skills to Solving Problems of Table, Bar Graphs and Pie Chart.
	(MA20AMC301)	C2212.4	Analyze the Techniques in Syllogism.
		C2212.5	Analyze the Techniques in Calender, Clocks and Number Series Analogy Concepts.
		C311.1	Apply the basics of geometric representation and transformations in CAD/CAM. (L3)
	6211	C311.2	Choose geometric modeling methods for building CAD models. (L3)
46	C311 CAD/CAM (ME20APC501)	C311.3	Compare NC, CNC and DNC. (L4)
		C311.4	Develop manual and computer aided part programming for turning and milling operations. (L3)
		C311.5	Summarize the principles of CAQC, Robotics AR, VR and AI in CIM. (L2)

		C312.1	Estimate safety factors of machine members subjected to static and dynamic loads. (L5)
47	C312 Design of Machine	C312.2	Design fasteners subjected to variety of loads. (L3)
47	Members (ME20APC502)	C312.3	Select of standard machine elements such as keys, shafts, couplings and springs. (L1)
		C312.4	Design of IC Engine parts. (L3)
		C313.1	Understand characteristics of laminar and turbulent flows. (L2)
48	C313 Fluid Mechanics &	C313.2	Understand the energy losses in different types of pipes. (L2)
46	Hydraulic Machines (ME20APC503)	C313.3	Identify the performance of different types of turbines. (L1)
		C313.4	Identify the performance of centrifugal pumps. (L1)
		C314.1	Explain the basic concepts of solar radiation and solar collectors
	6214	C314.2	Develop the Bio - Energy Concepts
49	C314 Renewable Energy Resources	C314.3	Explain the geothermal Energy ,Tidal and Wave Energy
	(EE20AOE503)	C314.4	Apply the principles of electrical technology to develop MHD power generator & Utilize different wind parameters for design of rotor
		C314.5	Make use of power curve for energy estimation and fuel cell Technology
		C315.1	Determine major process/processes of manufacturing used for given application.
		C315.2	Explain when and why metal forming is chosen compared to other compatible methods.
	C315 Metal Forming	C315.3	Analyze effect of parameters influencing metal forming and compare hot working and cold working with applications.
50	Process (ME20APE503)	C315.4	Explain capabilities and applications of bulk metal forming processes and sheet metal work.
		C315.5	Outline tooling and equipments required for important metal forming processes.
		C315.6	Examine effects of friction & lubrication and causes of common defects in metal forming.
		C316.1	Generate Solid CAD models of Machine Parts. (L3)
51	C316 CAD/CAM Lab (ME20APC504)	C316.2	Develop CNC programs for various machining operations. (L3)
		C316.3	Make use of modern software tools to accurately model parts for specific manufacturing operations.(L3)
		C317.1	Understand the Impact of jet on Flat vanes
	C317	C317.2	Apply the practical aspects of Bernoulli's principle
52	Fluid Mechanics & Hydraulic Machines Lab	C317.3	Estimate frictional forces applicable in a pipe to determine major and minor losses.

ř.	1		·
	(ME20APC505)	C317.4	Demonstrate hydraulic turbine and carry out their performance study useful in hydel power plants.
		C317.5	Examine and understand pump working characteristics under given constraints
		C318.1	Distinguish the different parts of the 3D printer.
	C318	C318.2	Perform the assembly of different parts of the 3D printer.
53	Additive Manufacturing (Virtual Lab)	C318.3	Analyze the different parameters effect on the performance of the 3D printer.
	(ME20ASC501)	C 318.4	Build the 3D printer by using the different parts available and apply this concept to build different type of 3D printers.
		C 318.5	Analyze the functioning of different parts which contributes to improve the performance of the 3D printer.
		C319.1	Analyze about cells and their structure and function. Different types of cells and basics for classification of living Organisms.
	C319 Mandatory	C319.2	Analyze about biomolecules, their structure and function and their role in the living organisms. How biomolecules are useful in Industry.
54	Noncredit Course Biology for	C319.3	Analyze about human physiology.
	Engineers (CH20AMC301)	C319.4	Analyze about genetic material, DNA, genes and RNA how they replicate, pass and preserve vital information in living Organisms.
×		C319.5	Apply biological Principles in different technologies for the production of medicines and Pharmaceutical molecules through transgenic microbes, plants and animals.
		C3110.1	Solve computational problems (L3).
55	C3110 Problem Solving and Programming	C3110.2	Select the features of C language appropriate for solving a problem (L4)
	(Lateral Entry Students Only) (IT20AMC501)	C3110.3	Design computer programs for real world problems (L6)
		C3110.4	Organize the data which is more appropriated for solving a problem (L6)
		C3111.1	Establish motivation for any topic of interest and develop a thought process for technical presentation
	C3111	C3111.2	Organize a detailed literature survey and build a document with respect to technical publications
56	Technical Seminar Presentation – I (ME20ATS501)	C3111.3	Analysis and comprehension of proof-of-concept and related data
	(ME20A15501)	C3111.4	Effective presentation and improve soft skills
		C3111.5	Make use of new and recent technology for creating technical reports
		C3112.1	Apply fundamental engineering principles to solve practical problems encountered in an industry setting
	C3112	C3112.2	Analyze and interpret technical data collected during the internship to draw meaningful conclusions
57	Evaluation of Summer Internship (ME20AIP501)	C3112.3	Design and propose solutions for real-world engineering challenges faced by the internship company, considering manufacturability, cost, and environmental impact
	(C3112.4	Effectively communicate internship experiences, findings, and recommendations through written reports and oral presentations

			1 m 2 m
		C3112.5	Demonstrate professionalism, teamwork skills, and a commitment to ethical practices while working in a collaborative engineering environment
		C321.1	Distinguish different numerical methods involved in Finite Element Analysis (L 3)
		C321.2	Apply equations in finite element methods for 1D, 2D and 3D problems. (L3)
58	C321 Finite Element Methods	C321.3	Apply shape functions in finite element formulations and use linear, quadratic, and cubic shape functions for interpolation (L3)
	(ME20APC601)	C321.4	Formulate and solve basic problems in heat transfer, solid mechanics and fluid mechanics. (L3)
		C321.5	Analyse beams and shafts using finite element analysis. (L4)
		C322.1	Apply the concepts of different modes of heat transfer. (L3)
		C322.2	Apply knowledge of conduction heat transfer in the design of insulation of furnaces and pipes. (L3)
59	C322 Heat Transfer (ME20APC602)	C322.3	Analyse free and forced convection phenomena in external and internal flows. (L4)
		C322.4	Design of thermal shields using the concepts of black body and non-black body radiation. (L5)
		C322.5	Use analytical and numerical solution techniques in solving heat transfer problems, including heat generation and extended surfaces. (L3)
		C323.1	Demonstrate the Rankine cycle and apply thermodynamic concepts on boilers. (L2)
		C323.2	Figure out the types and applications of steam nozzles and condensers and
60	C323 Thermal Engineering – II (ME20APC603)	C323.3	Solve the problems on Nozzles.(L3)
00		C323.4	Classify the steam turbines and describe it's working. (L2)
		C323.5	Explain the working of gas turbines and analyse the performance.(L2)
		C323.6	Demonstrate the principles of operation of refrigeration and Air-conditioning systems (L2)
		C324.1	Explain the practical applications of composites. (L3)
	C324	C324.2	Identify the various types of Polymer Matrix Composites. (L2)
61	Composite Materials	C324.3	Understand the Processing & Applications of MMCs. (L2)
	(ME20APE601)	C324.4	Classify the various types of Ceramic Matrix Materials. (L2)
		C324.5	Explain the applications of carbon fiber composites & bio composites. (L3)
		C325.1	Know the different types of disasters and their effects on environment.
	C225	C325.2	Have the knowledge about Causes of disasters.
62	C325 Disaster Management	C325.3	Gain knowledge about disaster management through engineering applications.
1	(CE204 OF COL)		

	(CE2UACEUUI)		
		C325.4	Explain the process of risk management
		C325.5	Distinguish between the different approaches needed to manage pre- during and post disaster periods
		C326.1	Explain the need for Finite Element Method in Manufacturing Design.
63	C326 Computer Aided	C326.2	Interpret the real life problems and propose sustainable design solutions for specific needs through applications of Engineering principles.
03	Engineering Lab (ME20APC604)	C326.3	Utilize FEA software to solve simple structural, heat transfer and fluid flow problems.
		C326.4	Analyze a physical problem, develop experimental procedures for accurately investigating the problem, and effectively perform.
		C327.1	Explain different modes of heat transfer
		C327.2	Identify parameters for measurement for calculating heat transfer
64	C327 Heat Transfer Lab (ME20APC605)	C327.3	Determine effectiveness of heat exchanger
		C327.4	Design new equipment related to heat transfer
	1 2	C327.5	Apply principles of heat transfer in wide application in industries
	C328	C328.1	Able to explain how common fibers are produced and how the properties of the fibers are related to the internal structure.
65	Instrumentation & Composite Materials (ME20APC606)	C328.2	Able to select matrices for composite materials in different applications.
		C328.3	Able to describe key processing methods for fabricating composites.
1905		C329.1	Write, Test and Debug Python Programs. (L1)
	C329 Skill Oriented	C329.2	Use Conditionals and Loops for Python Programs. (L3)
66	Course Application Development using	C329.3	Construct custom modules and functions to handle different operations. (L3)
	Python (IT20ASC301)	C329.4	Implement Object oriented concepts through real time scenarios and handle errors. (L3)
		C329.5	Design different shapes and objects using turtle graphics. (L4)
		C3210.1	Establish motivation for any topic of interest and develop a thought process for technical presentation
	C3210	C3210.2	Organize a detailed literature survey and build a document with respect to technical publications
67	Technical Seminar Presentation – II (ME20ATS601)	C3210.3	Analysis and comprehension of proof-of-concept and related data
	(ME20A13001)	C3210.4	Effective presentation and improve soft skills
	,	C3210.5	Make use of new and recent technology for creating technical reports
		C411.1	Identify different parts of automobile. (L3)

1-	1		
	C411	C411.2	Explain the working of various parts like engine, transmission, clutch, brakes.(L2)
68	Automobile Engineering (ME20APE701)	C411.3	Describe the working of steering and the suspension systems. (L2)
	(ME20APE/01)	C411.4	Summarize the environmental implications of automobile emissions. (L2)
-		C411.5	Outline the future developments in the automobile industry.(L2)
		C412.1	Understand the structure of materials (L2)
	C412	C412.2	Apply materials based on their structure and failure modes. (L2)
69	Mechanical Behavior of Materials	C412.3	Characterize materials using different machines. (L3)
	(ME20APE707)	C412.4	Summarize the various strengthening mechanisms with suitable examples. (L2)
	a.	C412.5	Identify the creep in different materials and its influence in selection of materials. (L3)
		C413.1	Model the material removal in various modern manufacturing processes.
	C413	C413.2	Analyze the processes and evaluate the role of each process parameter during machining of various advanced materials.
70	Modern Manufacturing Methods (ME20APE710)	C413.3	Understand material removal mechanism by using electro-thermal energy and its applications.
		C413.4	Select the chemical and electro chemical processes for micro-machining to fabricate micro device.
		C413.5	Know the Complex shape can be machined easily by using EBM and LBM.
		C414.1	Identify the major sources of air pollution.
	C414	C414.2	Understand their effects on health and environment.
71	Air Pollution and Quality Control	C414.3	Evaluate the dispersion of air pollutants in the atmosphere and to develop air quality models.
	(CE20AOE701)	C414.4	Choose and design control techniques for particulate and gaseous emissions.
		C414.5	Understand the noise pollution and control methods.
		C415.1	Develop a lighting scheme for a given practical case.
	C415	C415.2	Analyze the performance of Heating and Welding methods
72	Utilization of Energy in Electrical Utilities	C415.3	Make all numerical calculations associated with electric traction.
	(EE20AOE705)	C415.4	Evaluate the Mechanics of Train and its parameters
		C415.5	Analyze the economic aspects in utilisation of electrical energy
		C416.1	Understand the concepts & principles of management and designs of organization in a practical world

Consideration of the Constitution of the Const

			**
	C416	C416.2	Apply the knowledge of Work-study principles & Quality Control techniques in industry
	Management Science	C416.3	Analyze the concepts of HR Min Recruitment, Selection and Training & Development.
	(BA20AHS705)	C416.4	Evaluate PERT/CPM Techniques for projects of an enterprise and estimate time & cost of project & to analyze the business through SWOT.
		C416.5	Create Modern technology in management science
		C417.1	Identify the geometric relationship between input and output motion parameters of robotic arms.
	C417	C417.2	Formulate the transformation matrix through which a relationship is established between different links of the manipulator.
73	Mechanism and Robotics (Virtual Lab)	C417.3	Create the workspace through a 3D graph plot of manipulator position for various inputs. CO4: Assess the robot motion for various inputs of the joint angular value.
	(ME20ASC701)	C417.4	Interpret the simulation of mechanisms for different input parameters.
÷		C417.5	Analyse the various types of circuits used in construction of robots.
		C418.1	practice acquired knowledge within the chosen area of technology for project development
	C418 Evaluation of Industrial / Research Mini Project (ME20AIP701)	C418.2	Identify, discuss and justify the technical aspects of the chosen project with a comprehensive and systematic approach.
74		C418.3	Reproduce, improve and refine technical aspects for engineering projects
		C418.4	Work as an individual or in a team in development of technical projects
		C418.5	Communicate and report effectively project related activities and findings.
		C419.1	Establish motivation for any topic of interest and develop a thought process for technical presentation
	544	C419.2	Organize a detailed literature survey and build a document with respect to technical publications
75	C419 Technical Seminar Presentation – III	C419.3	Analysis and comprehension of proof-of-concept and related data
	(ME20ATS701)	C419.4	Effective presentation and improve soft skills
		C419.5	Make use of new and recent technology for creating technical reports
		C420.1	Define the project scope and objectives based on a comprehensive literature review and identify relevant engineering principles.
	C420	C420.2	Develop a detailed work plan with timelines, milestones, and resource allocation for project completion.
76	Project Work Stage - I	C420.3	Demonstrate proficiency in using appropriate engineering tools and software for project planning and analysis.
	(ME20APW701)	C420.4	Effectively communicate project goals, methodology, and initial findings through written reports and presentations.
		C420.5	Identify potential safety hazards and environmental considerations associated with the project.

			- 第二
		C421.1	Apply knowledge of Mechanical Engineering principles and problem-solving techniques to design and develop solutions for a complex engineering project
	C421 Project Work Stage – II / Full Internship in Industry (ME20APW801)	C421.2	Conduct thorough research, analyze data, and interpret results to support the design and development of the project.
77		C421.3	Demonstrate effective communication skills by preparing comprehensive project reports, presentations, and justifications for chosen solutions
		C421.4	Evaluate the project's impact on society and the environment, considering sustainability and ethical principles
		C421.5	Effectively manage project resources, timeline, and budget, demonstrating teamwork and leadership skills in a multidisciplinary setting.

HEAD
DEPARTMENT OF MECHANICAL ENGINEERING
SV COLLEGE OF ENGINEERING
KARAKAMBADI ROAD, TIRUPATI - 517 507

S.No	Year/Sem	Course No	Course Name	Course Outcomes:
				Develop the use of matrix algebra techniques that is needed by engineers for practical applications (L6)
				Utilize mean value theorems to real life problems (L3)
				familiarize with functions of several variables which is useful in
			Course Name Algebra and Calculus Engineering Chemistry Problem Solving & Programming Engineering Graphics Lab Engineering Workshop	optimization (L3)
1		19A54101	Algebra and Calculus	Students will also learn important tools of calculus in higher
				dimensions. Students willbecome familiar with 2- dimensional
				coordinate systems (L5)
				Students will become familiar with 3- dimensional coordinate systems and also learn the utilization of special functions
				demonstrate the corrosion prevention methods and factors affecting corrosion (L2)
				explain the preparation, properties, and applications of
				thermoplastics & thermosettings, elastomers & conducting polymers. (L2)
2		19A51101T	Engineering Chemistry	explain calorific values, octane number, refining of petroleum and cracking of oils (L2)
				explain the setting and hardening of cement and concrete phase (L2)
			a.	summarize the application of SEM, TEM and X-ray diffraction in
				surface characterization (L2
				Construct his own computer using parts (L6).
				Recognize the importance of programming language independent constructs (L2)
				Solve computational problems (L3)
3		19A05101T		Select the features of C language appropriate for solving a problem
			Programming	(L4)
	1-1		Programming	Design computer programs for real world problems (L6)
		9 "		Organize the data which is more appropriated for solving a problem (L6)
				draw various curves applied in engineering. (L2)
				show projections of solids and sections graphically. (L2)
4		19A03102	Engineering Graphics Lab	draw the development of surfaces of solids. (L3)
				use computers as a drafting tool. (L2)
				draw isometric and orthographic drawings using CAD packages. (L3)
				Apply wood working skills in real world applications. (I3)
_				Build different parts with metal sheets in real world applications. (I3)
5		19A03101	Engineering Workshop	Apply fitting operations in various applications. (I3)
				Apply different types of basic electric circuit connections. (I3)
				Demonstrate soldering and brazing. (I2)
				determine the cell constant and conductance of solutions (L3)
_	1	104511010	Fundamento - Chamilato I al	prepare advanced polymer materials (L2)
6		19A51101P	Engineering Chemistry Lab	determine the physical properties like surface tension, adsorption and
				viscosity (L3) estimate the Iron and Calcium in cement (L3)
				calculate the hardness of water (L4)
	ŀ			Construct a Computer given its parts (L6)
				Select the right control structure for solving the problem (L6)
7		19A05101P	Problem Solving &	Analyze different sorting algorithms (L4)
			Programming Lab	Design solutions for computational problems (L6)
				Develop C programs which utilize the memory efficiently using
				programming constructs like pointers.

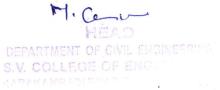

Apply concepts of KVL/KCL in solving DC circuits (L3) Choose correct rating of a transformer for a specific appli Illustrate working principles of induction motor - DC Moto Engineering Identify type of electrical machine based on their operati Describe working principles of protection devices used in	
1 19A02201T Engineering Identify type of electrical machine based on their operation	or (13)
Identify type of electrical machine based on their operati	JI (L3)
Describe working principles of protection devices used in	
	electrical
circuits. (L2) solve the differential equations related to various engineer	ering fields
(L6)	
Identify solution methods for partial differential equation Differential Equations and physical processes (L3)	ns that model
2 19A54201 Vector Calculus interpret the physical meaning of different operators suc gradient, curl and divergence (L5)	h as
estimate the work done against a field, circulation and flu	ux using
vector calculus (L6)	
Explain physics applied to solve engineering problems (L2	.)
Apply the principles of acoustics in designing of buildings	
Explains the applications of ultrasonics in various engine (L2)	ering fields
Apply electromagnetic wave propagation in different Op	tical Fibers
3 19A56102T Engineering Physics (L2)	
Apply the lasers concepts in various applications (L3)	
Explains the concepts of dielectric and magnetic materia	Is (L2)
Identify the sensors for various engineering applications	
Select Appropriate Data Structure for solving a real world (L4)	
Select appropriate file organization technique depending	g on the
4 19A05201T Data Structures processing to be done (L4) Construct Indexes for Databases (L6)	
Analyse the Algorithms (L4)	
Develop Algorithm for Sorting large files of data (L3	
Understand the context, topic, and pieces of specific info	ormation from ers of English
Apply grammatical structures to formulate sentences an word forms	d correct
5 19A52101T Communicative English 1 Analyze discourse markers to speak clearly on a specific	topic in
informal discussions	
Evaluate reading/listening texts and to write summaries global comprehension of these texts.	based on
Create a coherent paragraph interpreting a figure/graph	
I-II To remember and understand the different aspects of the language proficiency with emphasis on LSRW skills	e English
To apply communication skills through various language activities	learning
6 19A52101P Communicative English 1 Lab To analyze the English speech sounds, stress, rhythm, in syllable division for better listening and speaking compression.	
To evaluate and exhibit acceptable etiquette essential in	n social and
professional settings To create awareness on mother tongue influence and no	eutralize it in
order to improve fluency in spoken English.	
make moulds for sand casting. (L3)	
develop different weld joints. (L3)	
7 Mechanical Engineering assemble or disassemble of machine components. (L3) Workshop make plastic components. (L3)	
use power tools for different applications. (L3)	
Assemble computer and installation of software (L3)	

	1			Describe construction, working and characteristics of diodes, transistors and operational amplifiers (L2)
			Basic Electrical & Electronics Engineering Lab	Demonstrate how electronic devices are used for applications such as rectification, switching and amplification (L2)
8		19A02201P		Build different building blocks in digital electronics using logic gates (L3)
				Explain functionality of flip-flops, shift registers and counters for data processing applications (L2)
				Explain functioning of various communication systems (L2)
				Operate various optical instruments (L2)
				Estimate wavelength of laser and particles size using laser(L2)
	-			estimate the susceptibility and related magnetic parameters of magnetic materials (L2)
				plot the intensity of the magnetic field of circular coil carrying current
9		19A56102P	Engineering Physics Lab	with distance (L3) evaluate the acceptance angle of an optical fiber and numerical
				aperture (L3) determine magnetic susceptibility of the material and its losses by B-
				H curve (L3)
				identify the type of semiconductor i.e., n-type or p-type using hall effect (L3)
				Apply the concepts of sensors for various applications (L2)
				Select the data structure appropriate for solving the problem (L5)
10		19A05201P	Data Structures Lab	Implement searching and sorting algorithms (L3)
			Data Structures Lab	Design new data types (L6)
				Illustrate the working of stack and queue (L4)
-				Organize the data in the form of files (L6) Understand the analyticity of complex functions and conformal
			٠,	mappings.
				Apply Cauchy's integral formula and Cauchy's integral theorem to
			Complex Variables, Transforms	levaluate improper integrals along contours
1		19A54301	and PDE	Understand the usage of Laplace Transforms.
				Evaluate the Fourier series expansion of periodic functions.
				Formulate/solve/classify the solutions of Partial differential equations and also find the solution of one dimensional wave equation and heat
				equation.
				Apply the features of Python language in various real applications.
2		19A05304T	Python Programming	Select appropriate data structure of Python for solving a problem.
	(81		A 7 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2	Design object oriented programs using Python for solving real-world problems.
				Apply modularity to programs.
			1	Demonstrate different metal casting processes and gating systems. (L2)
				Classify working of various welding processes. (L2)
3		19A03301T	Manufacturing Processe's	Evaluate the forces and power requirements in rolling process. (L5)
		15A055011	Manufacturing Processes	Apply the principles of various forging operations. (L3)
				Outline the manufacturing methods of plastics, ceramics and powder metallurgy. (L1)
				Identify different unconventional processes and their applications.
				(L3)
				Resolve forces and couples in mechanical systems. (L3)
				Identify the frictional forces and its influence on equilibrium. (L3)
4		19A03302	302 Engineering Mechanics	Find the centre of gravity and moment of inertia for various geometric shapes (L3)
"		13403302		Develop equations for different motions. (L4)
				Determine the displacement, velocity and acceleration relations in
				dynamic systems (L4)
				Relate the impulse and momentum (L4)

SV COLLEGE OF ENGINEERING

AUTONOMOUS DEPARTMENT OF CIVIL ENGINEERING

S.No	Course Name	CO's	
		C111	Comment
	LINEAR ALGEBRA & CALCULUS	C111.	
. 1		C111.	Apply mean value theorems for different functions with different intervals. Analyze the multivariable collections with different intervals.
	(MA20ABS101)	C111.	
		C111.:	
	30	C112.1	Apply the different functions
			arrefer realing of physics and their applications in both scientific
2	Engineering Physics	C112.2	Understand the mechanisms of emission of light, the use of lasers as light sources for low and high energy applications. Understands the response of dielectric and magnetic materials to the applied electric and high energy applications.
	(PH20AB\$101)	C112.3	Understands the response of dielectric and magnetic materials to the applied electric and magnetic fields. Explain the basic concepts of acoustics and ultrasonics
		C112.4	Explain the basic concepts of acoustics and the description and magnetic fields
		C112.5	Apply the important properties of crystals like the
		C113.1	ray diffraction technique
			Kellieve the knowledge of basic grammatical
3	Communicative English	C113.2	Understand the context, topic, and pieces of specific information from social or transactional dialogues spoken by native spec
	(EG20AHS101)	C113.3	Apply grammotical training and a standard dialogues spoken by native spea
		C113.4	Apply grammatical structures to formulate sentences and correct word forms
		C113.5	
		C114.1	Evaluate reading/listening texts and to write summaries based on global comprehension of these texts. Apply concepts of KVL/KCL in solving DC circuits
1	Basic Electrical &	C114.2	Choose correct rating of a transformer for a specific application
4	Electronics Engineering	C114.3	mustrate working principles of induction motor. DCA4.
	(EE20AES101)	C114.4	identify type of electrical machine based on their energy.
		C114.5	Beschoe working principles of protection devices weed:
		C115.1	
5	Engineering Drawing	C115.2	
	(ME20AES102)	C115.3	Illustrate the projections of solids graphically
		C115.4	Draw and explore the sectional views of right rougher and the
		C115.5	Draw the development of surfaces of solids
- 1	P	C116.1 C116.2	Draw the basic views related to projections of Lines, Planes
6	Engineering Graphics Lab (ME20AES103)	C116.2	Draw the basic views related to projections of Planes
- 1		C116.4	mustrate orthographic views of simple objects
		C116.5	Illustrate isometric projections of simple solids.
		C117.1	Interpret and comprehend with drafting packages for engineering practice
	Engineering Physics Lab (PH20ABS102)	C117.2	
7		C117.3	Evaluate the acceptance angle of an optical fiber and numerical aperture Estimate the susceptibility and calculated a suscept
		C117.4	Estimate the susceptibility and related magnetic parameters of magnetic materials Organize the intensity of the magnetic field.
_		C117.5	Organize the intensity of the magnetic field of circular coil carrying current with distance Determine magnetic susceptibility of the material and its losses by B-H curve Able to handle and excel in a week first field of circular coil carrying current with distance
		C118.1	Able to handle and excel in a variety of self-incential its losses by B-H curve
8	Communicative English	C118.2	Able to employ better stress and intonation patterns and utter English sounds correctly Able to avoid the impact of mother torons in English.
0	Lab (EG20AUS102)	C118.3	Able to avoid the impact of mother tongue in English and neutralize their accent
	(EG20AHS102)	C118.4	
_		C118.5	Able to use computers in resume preparation, report-writing, and formatmaking etc. Learn the characteristics of basic electronic descriptions.
	Basic Electrical &	C119.1	
9	Electronics Engineering	C119.2	
	Lab	C119.3 C119.4	Analyze the application of diode as rectifiers, clippers and clampers and other circuits.
	(EE20AES102		
		C115.5	Able to use computers in resume preparation, report-writing, and formatmaking etc.
		C11A.1	Demonstrate knowledge basic mathematics to develop analytical ability
	Logical Chilling		Demonstrate knowledge basic mathematics to develop analytical skills to solving problems of Averages - Percentages - Ratio
0	Logical Skills for Professionals-I	C11A.2	Demonstrate knowledge basic mathematics to develop analytical skills to solving problems of Averages - Percentages – Ratio Compound Interest and time and stance.
	(MA20AMC101)	CHL	Demonstrate knowledge basis mathematics.
		C11A.3	Demonstrate knowledge basic mathematics to develop analytical skills to solving problems of time ad work, problems on trains and streams
		C11A.4	Analyze the techniques in series, coding and decoding and blood relations
_			
I.D.		2.21.1	apply solve the system of linear equations and reduce the
Di	V	C121.2	Apply Solve the system of linear equations and reduce the quadratic forms to canonical form by applying matrices. Apply mean value theorems for different functions with different intervals.
	(MAA 20 A DC201)	C121.3	Analyze the multivariable calculus to find Jacobson Marinetent intervals.
			regional for different control of the first and volume for different control of the first and the fi
-			and be the concepts of Bela and Gamma chaoial formation of the
			The constituents of Colliposites and its classification
			tentify the feet CC
Е	Engineering Chemistry	0122.2	termy the factors affecting the refractory material
Е	Engineering Chemistry (CH20ABS101)	C122.3	lentify the factors affecting the refractory material lustrate the functions and properties of lubricants
Е	Engineering Chemistry (CH20ABS101)	C122.3 III	lustrate the factors affecting the refractory material lustrate the functions and properties of lubricants emonstrate the phases and reactivity of concrete formation dentify the constituents of Portland cement

	C123.2	To illustrate the basic concepts of C programming language.
Problem Solving Using C	C123.2	To discuss the concepts of Functions, Arrays, Pointers and Structures.
(CS20AES101)	C123.4	To familiar with Dynamic memory allocation concepts.
	C123.5	To apply concepts of structures and files to solve real word problems.
		Understand the different types of couples and force systems
	C124.2	Determine the centroid and moment of inertia for different cross-sections
	C124.3	Understand the concepts of stress, strain, generalized Hooke's law, elastic moduli and strain energy.
(CE20AES201)	C124.4	Develop shear force and bending moment diagrams for different load cases.
	C124.5	Compute the flexural stresses and shear stresses for different loading cases and different cross-sections.
	C125.1	Apply fitting operations in various applications for good strength
F	C125.2	Analyze different types of basic electric circuit connections
	C125.3	Demonstrate soldering and brazing in joining circuits.
(MEZUAESIUI)	C125.4	Make moulds for sand casting using standard equipment.
		Develop different weld joints for various metals.
	C126.1	Assemble and disassemble a computer from its parts and prepare the computer ready to use.
1 77.17	C126.2	Installation process of different types Operating system for a computer by their own
10-00 TO 07-00-07-07-08-07	C126.3	Interconnect two or more computers for information sharing
(CS20AES103)	C126.4	Access the Internet and browse it for required information.
1		Prepare the documents using Word Processor, prepare spread sheets for calculations using
		Build algorithm and flowchart for simple problems.
Problem Solving Using C		Use suitable control structures to solve problems
Lab		Use suitable iterative statements and arrays to solve the problems.
(CS20AES102)		Implement Programs using functions and pointers.
		Develop code for complex applications using structures, unions and file handling features
		Determine the moisture content in the coal sample
Engineering Chemistry		Prepare advanced polymer materials
		Determine the physical properties like adsorption and viscosity
I		Estimate Iron in cement
(CH20/ID0102)		Calculate the hardness of water and dissolved oxygen
 		Able to analyse the behaviour of mild steel for various tension, direct shear, torsion test.
l . }		Evaluating the deflection limits of beams by the concept of modulus of elasticity.
Strength of Materials Lab		
(CE20AES202)		Determination of compressive strength of wood. Evaluation of material hardness by hardness test.
		Understanding the Impact test on metals
1		Understanding multidisciplinary nature of environmental studies and various renewable and nonrenewable resources.
Environmental Science		Understand flow and bio-geo- chemical cycles and ecological pyramids
(CH20AMC201)		Understand various causes of pollution and solid waste management and related preventive measures
		Apply the rainwater harvesting, watershed management, and ozone layer depletion and waste land reclamation.
		Apply the concepts of population explosion, value education and welfare programmes in society
Speech & Oral		Improve the neutral accent and be free from mother tongue influence.
Communication		Hypothesizing small talks on general topics and learn critiquing skills by participating in Conversations.
	C12B.3	Applying Vocabulary and using it in their day-to-day life.
(EG20AMC101)		
(EG20AMC101)	C12B.4	Understanding and mastering in verbal and non-verbal communication.
	C12B.4 C211.1	Apply Cauchy-Riemann equations to find the analyticity of complex functions.
Complex Variables,	C12B.4 C211.1 C211.2	Apply Cauchy-Riemann equations to find the analyticity of complex functions. Apply Cauchy's integral formula and Cauchy's integral theorem to evaluate improper integrals along contours.
Complex Variables, Transforms & Applications	C12B.4 C211.1 C211.2 C211.3	Apply Cauchy-Riemann equations to find the analyticity of complex functions. Apply Cauchy's integral formula and Cauchy's integral theorem to evaluate improper integrals along contours. Analyze the concepts of Laplace Transforms to solve ordinary differential equations.
Complex Variables, Transforms & Applications to Partial Differential	C12B.4 C211.1 C211.2	Apply Cauchy-Riemann equations to find the analyticity of complex functions. Apply Cauchy's integral formula and Cauchy's integral theorem to evaluate improper integrals along contours.
Complex Variables, Transforms & Applications	C12B.4 C211.1 C211.2 C211.3	Apply Cauchy-Riemann equations to find the analyticity of complex functions. Apply Cauchy's integral formula and Cauchy's integral theorem to evaluate improper integrals along contours. Analyze the concepts of Laplace Transforms to solve ordinary differential equations.
Complex Variables, Transforms & Applications to Partial Differential Equations	C12B.4 C211.1 C211.2 C211.3 C211.4	Apply Cauchy-Riemann equations to find the analyticity of complex functions. Apply Cauchy's integral formula and Cauchy's integral theorem to evaluate improper integrals along contours. Analyze the concepts of Laplace Transforms to solve ordinary differential equations. Examine the Fourier series for different functions in half and full range.
Complex Variables, Transforms & Applications to Partial Differential Equations (MA20ABS301)	C12B.4 C211.1 C211.2 C211.3 C211.4 C211.5	Apply Cauchy-Riemann equations to find the analyticity of complex functions. Apply Cauchy's integral formula and Cauchy's integral theorem to evaluate improper integrals along contours. Analyze the concepts of Laplace Transforms to solve ordinary differential equations. Examine the Fourier series for different functions in half and full range. Solve one-dimensional wave equation heat equation and Laplace equations by applying Fourier series. Concept of Energy theorems & deflections for analysing of structures. Application of Castiglianos theorem for analysis of forces in intermediate trusses.
Complex Variables, Transforms & Applications to Partial Differential Equations (MA20ABS301) Structural Analysis-I	C12B.4 C211.1 C211.2 C211.3 C211.4 C211.5 C212.1	Apply Cauchy-Riemann equations to find the analyticity of complex functions. Apply Cauchy's integral formula and Cauchy's integral theorem to evaluate improper integrals along contours. Analyze the concepts of Laplace Transforms to solve ordinary differential equations. Examine the Fourier series for different functions in half and full range. Solve one-dimensional wave equation heat equation and Laplace equations by applying Fourier series. Concept of Energy theorems & deflections for analysing of structures.
Complex Variables, Transforms & Applications to Partial Differential Equations (MA20ABS301)	C12B.4 C211.1 C211.2 C211.3 C211.4 C211.5 C212.1 C212.2	Apply Cauchy-Riemann equations to find the analyticity of complex functions. Apply Cauchy's integral formula and Cauchy's integral theorem to evaluate improper integrals along contours. Analyze the concepts of Laplace Transforms to solve ordinary differential equations. Examine the Fourier series for different functions in half and full range. Solve one-dimensional wave equation heat equation and Laplace equations by applying Fourier series. Concept of Energy theorems & deflections for analysing of structures. Application of Castiglianos theorem for analysis of forces in intermediate trusses.
Complex Variables, Transforms & Applications to Partial Differential Equations (MA20ABS301) Structural Analysis-I	C12B.4 C211.1 C211.2 C211.3 C211.4 C211.5 C212.1 C212.2 C212.3	Apply Cauchy-Riemann equations to find the analyticity of complex functions. Apply Cauchy's integral formula and Cauchy's integral theorem to evaluate improper integrals along contours. Analyze the concepts of Laplace Transforms to solve ordinary differential equations. Examine the Fourier series for different functions in half and full range. Solve one-dimensional wave equation heat equation and Laplace equations by applying Fourier series. Concept of Energy theorems & deflections for analysing of structures. Application of Castiglianos theorem for analysis of forces in intermediate trusses. Develop the deflection, Bending moment and shear diagrams for beams under various loading conditions.
Complex Variables, Transforms & Applications to Partial Differential Equations (MA20ABS301) Structural Analysis-I	C12B.4 C211.1 C211.2 C211.3 C211.4 C211.5 C212.1 C212.2 C212.3 C212.4 C212.5	Apply Cauchy-Riemann equations to find the analyticity of complex functions. Apply Cauchy's integral formula and Cauchy's integral theorem to evaluate improper integrals along contours. Analyze the concepts of Laplace Transforms to solve ordinary differential equations. Examine the Fourier series for different functions in half and full range. Solve one-dimensional wave equation heat equation and Laplace equations by applying Fourier series. Concept of Energy theorems & deflections for analysing of structures. Application of Castiglianos theorem for analysis of forces in intermediate trusses. Develop the deflection, Bending moment and shear diagrams for beams under various loading conditions. Analysis of continuous beams & portal frames by slope deflection method. Analysis of continuous beams & portal frames by moment distribution method.
Complex Variables, Transforms & Applications to Partial Differential Equations (MA20ABS301) Structural Analysis-I	C12B.4 C211.1 C211.2 C211.3 C211.4 C211.5 C212.1 C212.2 C212.3 C212.4	Apply Cauchy-Riemann equations to find the analyticity of complex functions. Apply Cauchy's integral formula and Cauchy's integral theorem to evaluate improper integrals along contours. Analyze the concepts of Laplace Transforms to solve ordinary differential equations. Examine the Fourier series for different functions in half and full range. Solve one-dimensional wave equation heat equation and Laplace equations by applying Fourier series. Concept of Energy theorems & deflections for analysing of structures. Application of Castiglianos theorem for analysis of forces in intermediate trusses. 	1		
28	Surveying Lab	C217.2	
20	(CE20APC306)	C217.3	Able to use the knowledge of basic survey instruments for computation of area of a land into field account
		C217.4	Able to use the technics of L.S and C.S to analyze difference in levelling
		C217.5 C218.1	
		C218.1	Able to date wenturimeter and orifice meter.
29	Fluid Mechanics and		Able to determine the coefficient of discharge for a small orifice by constant head method and variable head method.
29	Hydraulic Machines Lab	C218.3	Able to determine the coefficient of discharge for an external mouth piece by constant head method and variable head method
	(CE20APC307)	C218.4	Able to calibrate rectangular and triangular notches.
		C218.5	Able to determine friction factor and loss of head in sudden contraction and expansion.
		C219.1	Analyze the problems using asymptotic notations.
20	Real-time application of	C219.2	Apply Stack, Queues and linked list to solve different applications
30	Data Structures	C219.3	Demonstrate suitable sorting techniques for the real-world problem
	(CS20ASC301)	C219.4	Implement tree structures in different patterns of representation of data
		C219.5	Analyze the given problem using graph traversal techniques
	-	C21A.1	Able to understand about cells and their structure and function along with different types of cells and basics for classification of living Organisms.
		C21A.2	Able to explain about biomolecules, their structure and function and their role in the living organisms along with how
31	Biology for Engineers		oremore dies are discrut in middstry.
	(CH20AMC301)	C21A.3	Able to analyse about human physiology.
		C21A.4	Able to understand about genetic material, DNA, genes and RNA how they replicate, pass and preserve vital information in living Organisms.
		C21A.5	Able to know about application of biological Principles in different technologies for the production of medicines and Pharmaceutical molecules through transgenic microbes, plants and animals.
		C21B.1	Demonstrate knowledge basic mathematics to develop analytical skills to solving problems of HCE LCM Feature and
	Logical Skills for	C21P 2	is in printed to it.
32	Professionals-II	C21B.2	Demonstrate knowledge basic mathematics to develop analytical skills to solving problems of Pipes, Alligation or Mixture.
	(MA20AMC301)	C21B.3	Demonstrate knowledge basic mathematics to develop analytical skills to solving problems of Table, Bar Graphs and Pie Chart.
		C21B.4	Analyze the techniques in Syllogism.
		C21B.5	Analyze the techniques in Synogism. Analyze the techniques in Calendar, Clocks and Number Series Analogy concepts.
		C21C.1	Use English language, both written and spoken, competently and correctly.
	Enhancing English	C21C.2	Improve comprehension and fluency of speech
33	Language Skills	C21C.3	Hone the communication skills to meet the challenges of their careers successfully
	(EG20AMC301)	C21C.4	Gain confidence in using English in verbal situations
		C21C.5	Strengthen communication skills in different contexts like formal and informal
		C221.1	Able to understand the characteristics of soils and assess relationships between different results.
		C221,2	Able to determine the permeability of soils and stratified soils, explain factords affecting permeability and extinct a large strategy of the soil of
34	Soil Mechanics (CE20AES401)	C221.3	seepage using flow net. Able to compute stresses in soils under various loading conditions, explain compaction of soils and understand compaction control.
	-		
		C221.4	Able to understand the consolidations and settlement of soils, Differentiate compaction and consolidation & Primary and secondary consolidation.
		C221.5	Able to determine the shear strength of the soil and to understand the various shear tests based on drainage conditions.
	None de la	C222.1	1 1991 different methods to find foots of algebraic and franscendental equations
35	Numerical Methods, Probability and Statistics	C222.2	Apply different methods to find approximate solution of ordinary differential equations and N
55	(MA20ABS401)	C222.3	Than ye the concepts of probability and their applications
	(33.1201135401)	C222.4 C222.5	Apply discrete and continuous probability distributions in practical problems.
		C223.1	Analyse the statistical inferential methods based on small and large sampling tests.
		C223.2	Determine deflection at any point on a beam under simple and combined loads Apply approach to a few point on a beam under simple and combined loads
36	Structural Analysis-II	C223.3	Apply energy theorems for analysis of indeterminate structures Analyze hearns and portal frames with the structures
	(CE20APC401)	C223.4	Analyze beams and portal frames using slope deflection Analyze beams and portal frames using moment distribution methods
		C223.5	Analyze beams and portal frames using moment distribution methods Analyze beams and portal frames using Kani's method.
		C224.1	Able to understand about quality of water and purification process
	Environmental	C224.2	Able to classify and select appropriate technique for treatment of waste water.
37	Engineering	C224.3	Able to assess the impact of air pollution.
	(CE20APC402)	C224.4	Able to understand consequences of solid waste and its management
		C224.5	Able to design domestic plumbing systems.
	Managarial E	C225.1	Should be able to understand managerial economics and demand analysis.
38	Managerial Economics & Financial Analysis	C225.2	Should be able to analyze decisions relating to production and cost analysis
50	(BA20AHS301)	C225.3	Should be able to evaluate market structures and forms of business
	(5/120/110501)	C225.4	Should be able to assess financial statements and ratios.
		C225.5 C226.1	Should be able to apply capital budgeting methods. Able to identify various soils based on their characteristics.
			Aute to identify Various soils based on their characteristics
1			Able to evaluate name of the state of their characteristics.
39	Soil Mechanics Lab	C226.2	Able to evaluate permeability and seepage of soils
39	Soil Mechanics Lab (CE20AES402)	C226.2 C226.3	Able to evaluate permeability and seepage of soils. Able to determine plasticity characteristics of various soils.
39		C226.2 C226.3 C226.4	Able to evaluate permeability and seepage of soils. Able to determine plasticity characteristics of various soils. Able to perform consolidation process by predicting settlement of soils.
39		C226.2 C226.3 C226.4 C226.5	Able to evaluate permeability and seepage of soils. Able to determine plasticity characteristics of various soils. Able to perform consolidation process by predicting settlement of soils. Able to perform various shear tests to the soil
	(CE20AES402)	C226.2 C226.3 C226.4	Able to evaluate permeability and seepage of soils. Able to determine plasticity characteristics of various soils. Able to perform consolidation process by predicting settlement of soils. Able to perform various shear tests to the soil. Able to gain basic knowledge on characteristics of rocks and minerals.
39	(CE20AES402) Geology Lab	C226.2 C226.3 C226.4 C226.5 C227.1	Able to evaluate permeability and seepage of soils. Able to determine plasticity characteristics of various soils. Able to perform consolidation process by predicting settlement of soils. Able to perform various shear tests to the soil. Able to gain basic knowledge on characteristics of rocks and minerals. Able to identify and differentiate rocks using geological classification.
	(CE20AES402)	C226.2 C226.3 C226.4 C226.5 C227.1 C227.2 C227.3 C227.4	Able to evaluate permeability and seepage of soils. Able to determine plasticity characteristics of various soils. Able to perform consolidation process by predicting settlement of soils. Able to perform various shear tests to the soil. Able to gain basic knowledge on characteristics of rocks and minerals. Able to identify and differentiate rocks using geological classification. Able to carry out geo physical investigations for infrastructural projects. Able to apply concepts of structural geology for civil engineering structural.
	(CE20AES402) Geology Lab	C226.2 C226.3 C226.4 C226.5 C227.1 C227.2 C227.3 C227.4 C227.5	Able to evaluate permeability and seepage of soils. Able to determine plasticity characteristics of various soils. Able to perform consolidation process by predicting settlement of soils. Able to perform various shear tests to the soil. Able to gain basic knowledge on characteristics of rocks and minerals. Able to identify and differentiate rocks using geological classification.

	î .		
	Material Testing Lab	C228.2	Able to evaluate the properties of the aggregates for their suitability in building construction.
41	(CE20APC404)	C228.3	Able to evaluate the properties of the binding materials for their suitability in building construction
	, , , , , , , , , , , , , , , , , , , ,	C228.4	Able to understand the workability behaviour of concrete through various tests
		C228.5	Able to evaluate the strength of hardened concrete through destructive and non-destructive tests
		C229.1	Memorize various elements of effective communicative skills
40	C A CI ''' (DCCC) CCC	C229.2	Interpret people at the emotional level through emotional intelligence
42	Soft Skills (EG20ASC301)	C229.3	Apply critical thinking skills in problem solving
		C229.4	Analyze the needs of an organization for team building
		C229.5	Judge the situation and take necessary decisions as a leader
		C22A.1	Develop the use of matrix algebra techniques that is needed by engineers for practical applications
12	Universal Human Values	C22A.2	Utilize mean value theorems to real life problems
43	(BA20AHS201)	C22A.3	Solve the differential equations related to various engineering fields
		C22A.4	Apply multiple integrals to find the area and volumes for different functions.
		C22A.5	Estimate the work done against a field, circulation and flux using vector calculus
		C311.1	Able to understand the basic concepts of working stress and limit state design methods.
		C311.2	Able to understand behavior of beams under shear, torsion and also visualize importance of bond and anchorage.
	Design of Reinforced	C311.3	Able to understand behavior of columns with different slenderness characteristics. Contrast behavior of columns axial. And understand behavior of columns axial.
44	Concrete Structures	15121707070	uniaxial biaxial eccentricities and designs of RC columns.
	(CE20APC501)	C311.4	Able to classify footings based on shape and utility, examine the field conditions and suggest appropriate footings and design
		15.5.5.1	reinforced concrete footings.
		C311.5	Able to classify understand performance of slabs based on dimensions and design reinforced concrete slabs & Stair cases as per
			codal provisions.
		C312.1	Understanding the importance of planing and survey in highway development
45	Highway Engineering	C312.2	Able to design the cross section elements, sight distance, horizontal and vertical alingments
43	(CE20APC502)	C312.3	Understanding the concept of traffic studies,traffic regulations and control and intersection to design a traffic system.
		C312.4	Able to design different types of intersections
		C312.5	Able to design the flexible and rigid pavements by using IRC code provisions
		C313.1	Understand the concept of soil exploration techniques for reconnaisance.
46	Foundation Engineering	C313.2	Analysing of stability of earth slopes.
40	(CE20APC503)	C313.3	Evaluating the earth pressures of cohessive and cohession less soils by various methods
		C313.4	Able to analysis the settlement of pile foundations and cassions
		C313.5	Analysing the suitability of foundations based on soil condition
		C314.1	Able to Know usage of mysql workbench
48	Structured Query	C314.2	Able to explain Databases and its usage
40	Language (CS20AOE503)	C314.3	Able to use select statement to retrieve data
		C314.4	Able to construct key relationships on a table.
		C314.5	Able to explain how to join more than one table
		C315.1	Understand the planning, design, evaluation, construction and financing of housing projects with cost effective housing
	Cost Effective Housing Techniques	C215.2	techniques.
48		C315.2	Have knowledge on living condition of slum, slum housing policies, and slum improvement.
	(CE20APE502)	C315.3 C315.4	Know the usage of various low cost housing techniques.
		C315.5	Understand about alternative building materials for low cost housing and Rural housing.
		C313.3	Adopt the suitable techniques in rural and disaster prone areas by using locally available materials
		C316.1	Perform common environmental experiments relating to water and wastewater quality, and know which tests are appropriate for given environmental problems.
	Environmental	C316.2	
49	Engineering Lab	C310.2	Statistically analyze and interpret laboratorial results
	(CE20APC504)	C316.3	Apply the laboratorial results to problem identification, quantification, and basic environmental design and technical solutions
		C316.4	
		C316.5	Understand and use the water and wastewater sampling procedures and sample preservations. Understand the impact of water and wastewater treatment on people and the environment
	Advanced Soil Mechanics Lab (CE20APC505)	C317.1	Identify various engineering properties of soils.
		C317.1	
50		C317.3	Determine compaction characteristics of various soils. Evaluate Shear strength and load carrying capacity of soils.
		C317.4	Determine swelling characteristics of soils
		C317.5	Design consolidation process by predicting settlement of soils.
	Elements of Building, Planning and Drawing		
		C318.1	To impart the practical knowledge in detailing and drawing of various components of building and Different types of Buildings.
		C318.2	Interpret the symbols, signs and conventions from the given drawing.
٠.			The student should be able to distinguish the relation between the plan, elevation and cross section and identify the form and
51		C318.3	functions among the buildings.
	(CE20ASC501)		
		C318.4	The student is expected to learn the skills of drawing building elements and plan various types of buildings as per requirements.
		C318.5	Student should be able to plan various buildings as per the building by-laws.
		C319.1	Understand historical background of the constitution making and its importance for Building a democratic India.
	Constitution of India	C319.2	Understand the functioning of three wings of the government ie., executive, legislative and judiciary.
		C319.3	Understand the value of the fundamental rights and duties for becoming good citizen of India.
50	Constitution of India	~~.	Analyze the decentralization of power between central, state and local self-government
52	(BA20AMC501)	C319.4	
52		C319.4	Apply the knowledge in strengthening of the constitutional institution 11 and of the constitution
52		C319.4 C319.5	Apply the knowledge in strengthening of the constitutional institutions like CAG, Election Commission and UPSC for sustaining
52	(BA20AMC501)	C319.5	Apply the knowledge in strengthening of the constitutional institutions like CAG, Election Commission and UPSC for sustaining democracy
	(BA20AMC501) Problem Solving and	C319.5	Apply the knowledge in strengthening of the constitutional institutions like CAG, Election Commission and UPSC for sustaining democracy Solve computational problems.
52	(BA20AMC501) Problem Solving and Programming	C319.5 C31A.1 C31A.2	Apply the knowledge in strengthening of the constitutional institutions like CAG, Election Commission and UPSC for sustaining democracy Solve computational problems. Select the features of C language appropriate for solving a problem
	(BA20AMC501) Problem Solving and	C319.5 C31A.1 C31A.2 C31A.3	Apply the knowledge in strengthening of the constitutional institutions like CAG, Election Commission and UPSC for sustaining democracy Solve computational problems. Select the features of C language appropriate for solving a problem Design computer programs for real world problems
	(BA20AMC501) Problem Solving and Programming	C319.5 C31A.1 C31A.2 C31A.3 C31A.4	Apply the knowledge in strengthening of the constitutional institutions like CAG, Election Commission and UPSC for sustaining democracy Solve computational problems. Select the features of C language appropriate for solving a problem Design computer programs for real world problems Organize the data which is more appropriated for solving a problem
	(BA20AMC501) Problem Solving and Programming	C319.5 C31A.1 C31A.2 C31A.3	Apply the knowledge in strengthening of the constitutional institutions like CAG, Election Commission and UPSC for sustaining democracy Solve computational problems. Select the features of C language appropriate for solving a problem Design computer programs for real world problems Organize the data which is more appropriated for solving a problem Able to understand bolted and welded connections, estimate strength of welds and design Welded and Bolted connections as per
	(BA20AMC501) Problem Solving and Programming	C319.5 C31A.1 C31A.2 C31A.3 C31A.4	Apply the knowledge in strengthening of the constitutional institutions like CAG, Election Commission and UPSC for sustaining democracy Solve computational problems. Select the features of C language appropriate for solving a problem Design computer programs for real world problems Organize the data which is more appropriated for solving a problem

	(CE20APC601)	C321.3	Able to understand behavior of simple and compound beams, visualize importance of curtailment of flange plates and design detail of steel beams under different conditions adopting IS Code.
	(CL20A1 C001)	C321.4	Able to understand behavior of builtup columns, Column bases and design of built-up columns and column bases adopting Code.
		-	Able to identify different common of the second of the sec
_		C321.5	Able to identify different components of plate girder, design of components of plate girder confirming to IS Code and to Understand the functioning of gantry girder for different types of loads.
		C322.1	Able to understand of the theories and principles governing the label.
	Water Resources	C322.2	
55	Engineering		
	(CE20APC602)	C322.3	Able to develop Intensity-Duration-Frequency and Depth-Area Duration curves to design hydraulic structures.
		C322.4	Able to understand duty dales with and model hydrologic processes.
		C322.5	rest to diddistand duty, della soll-water-plant relationships and delivery
	Fotimetics Co	C323.1	
56	Estimation Costing and Valuation	C323.2 C323.3	Able to formulate specifications and tender documents
	(CE20APC603)	C323.4	Able to prepare contract agreements
		C323.5	Able to determine rate analysis of different items. Able to perform valuations of buildings.
		C324.1	Understanding the concept of permanent way in railway studies
57	Railways, Airport and	C324.2	Able to design the geometric elements of railway track by various much 1
31	Harbor Engineering	C324.3	Able to relate the Aircraft characteristics and their influence on an and their influence on an analysis of their influence of their influence of their influence on an analysis of their influence on an analysis of their influence of
	(CE20APE601)	C324.4	reste to unaryse the design elements of runways and favingays
		C324.5 C325.1	Able to understand the concept of Harbours and Docks in field and in the
	Web Technists	C325.1	Attacyze a web page and identify its elements and attributes
58	Web Technologies (AM20AOE502)	C325.3	Create web pages using XHTML and Cascading Styles sheets. Installation and usage of Server software's.
	(2070E302)	C325.4	Database Connectivity to web applications
		C325.5	Build web applications using Servlet and ISP
		C326.1	Able to use the concept of theodolites, trigonometric, curve setting, setting out works, contours, total station in civil engineer field
59	Advanced Surveying Lab	C326.2	Able to solve horizontal 8
39	(CE20APC604)	C326.3	Able to solve horizontal & vertical angles by method of repetition and reiteration.
		C326.4	Able to solve heights and distances by trigonometric levelling and tacheometric survey Able to use Total station for remote heights and angle measurement in advanced survey techniques
		C326.5	
	Trongo and di	C327.1	
50	Transportation Engineering Lab	C327.2	Able to analyse the grades and properties of hitumen
	(CE20APC605)	C327.3 C327.4	Able to develop a report on traffic volume studies at mid block and intersections Able to design the traffic signals
			Analyzing the limits for aggregate and bitumen
		C328.1	Develop drawing skills for effective demonstration of building details.
51	Building Drawing Using	C320.2	Draw building plans using Computer Aided Design and Drafting asferons;
, 1	Auto CAD (CE20APC606)	C320.3	Develop engineering project drawings incorporating details and devi-
			Examine efficiency of CAD design
			Develop drawing skills for effective demonstration of building details Write, Test and Debug Python Programs
	Application Development	C329.2	Use Conditionals and Loops for Python Programs
	Using Python	C329.3	Construct custom modules and functions to handle different operations
	(IT20ASC301)	C329.4	Implement Object oriented concepts through real time scenarios and hearth
			- congretative of the state of
	Intellectual Property	C32A.1 C32A.2	Understand IPR law & Cyber law
	Rights and Patents	C32A.2	Discuss registration process, maintenance and litigations associated with trademarks Illustrate the copy right law
	(BA20AMC502)		Enumerate the trade secret
		C32B.1	Demonstrate various AI applications, languages and Intelligent A.
	AI Tools Techniques and	CCLDIL .	solve problems using search strategies and understand the basis are asset to the
	Applications		
	-	C32D.4	Develop an expert system.
		C32B.5 C	Comprehend the structure of an artificial neural network and identify the building blocks of a convolutional neural network dentify the major sources of air pollution and understand their effects the building blocks of a convolutional neural network
	Air Pollution and Control		
2	(CE20APE703)		Evaluate the dispersion of air pollutants in the atmosphere and to develop air quality models. Ascertain and evaluate sampling techniques for atmospheric and stack pollutants.
	_		choose and design control techniques for particulate and daspous aminois
-		C411.5	onderstand the air pollution due to automobiles and control methods
	-	C412.1 A	tible to use the concept of environmental hazards and disasters tocroate assets
-	Disaster Management &	C	tote to develop awareness programs to educate people on apparent 11
1	Mitigation (CE20APE706)		to to defend most endogenous hazard and develops human adjustment to 1
_		C412.5 A	ble to develop plan to execute during disaster preparedness and management.
		C413.1 A	of to understand methods of in-situ densification and study different to the state of the state
	6 11		
	Ground Improvement Techniques		
	(CE20APE710)	C413.4	ble to understand principles of reinforced earth in ground improvement and study procedures for verification of stability of opes.
	(CE20APE710)	9	opes.
	(0220/112/10)	C412 5 A	ble to utilization of geo-synthetics and geo-textiles, Compare different types of synthetic based soil stabilization material and inderstand methods and efficiency of grouting.

	l				
65	Composite Materials & its	C414.2	Identify the various types of Polymer Matrix Composites.		
	Applications (ME20AOE701)	C414.3	Understand the Processing & Applications of MMCs.		
		C414.4	Classify the various types of Ceramic Matrix Materials.		
		C414.5	Explain the applications of carbon fiber composites & bio composites		
	Utilization of Energy & Electrical Utilities (EE20AOE705)	C415.1	Develop a lighting scheme for a given practical case.		
		C415.2	Analyse the performance of Heating and Welding methods		
66		C415.3	Make all numerical calculations associated with electric traction.		
		C415.4	Evaluate the Mechanics of Train and its parameters		
		C415.5	Analyse the economic aspects in utilisation of electrical energy		
		C416.1	Understand the concepts & principles of management and designs of organization in a practical world		
1		C416.2	Apply the knowledge of Work-study principles & Quality Control techniques in industry		
67	Management Science (BA20AHS705)	C416.3	Analyze the concepts of HR Min Recruitment, Selection and Training & Development.		
67		C416.4	Evaluate PERT/CPM Techniques for projects of an enterprise and estimate time & cost of project & to analyze the business		
			through SWOT.		
		C416.5	Create Modern technology in management science		
	Computer Aided Design of Structures (CE20ASC701)	C417.1	Able to analyse and design steel tabular truss using CAD software		
		C417.2	Able to analyse and design retaining walls using CAD software		
68		C417.3	Able to analyse and design simple towers using CAD software		
		C417.4	Able to analyse and design one-way & two way slabs using CAD software		
		C417.5	Able to analyse and design the column using CAD software		
	Project Work Stage- II (CE20APW801)	C423.1	Able to apply the fundamental engineering knowledge for development of components, products, processes or technologies in the		
			engineering field.		
		C423.2	Able to apply knowledge gained in solving real time engineering problems.		
69		C423.3	Able to design and develop solutions for the given problems.		
1					
-		C423.4	Able to investigate the problems using advanced technologies and use modern tools for solving different real world problems.		
		C423.5	Able to document the work and can lead the team in multidisciplinary fields.

DEPARTMENT OF CIVIL ENGINEERING
S.V. COLLEGE OHOD MODINEERING
KARAKAMBABI ROAD, TIEUFATI 542 0

SRI VENKATESWARA COLLEGE OF ENGINEERING KARAKAMBADI ROAD, TIRUPATI-517507

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

	Programme Outcome						
POs	Engineering Knowledge:						
1	in aging specialization to the solution of complex engineering problems as appropriate						
O1 1	the field of electronics & communication engineering practice.						
	Problem analysis: Ability to Identify, formulates, review research literature, and analyze complex Engineering						
	Ability to Identify, formulates, review research included, and days problems reaching substantiated conclusions using first principles of mathematics, natural						
PO2	sciences, and engineering sciences.						
	- the complex engineering problems and design system						
	ability to Design solutions for complex engineering problems and any or processes that meet the specified needs with appropriate consideration for the public or processes that meet the specified needs with appropriate consideration for the public or processes that meet the specified needs with appropriate considerations.						
PO3	health and safety, and the cultural, societal, and environmental considerations.						
	Conduct investigations of complex problems: Apply research-based knowledge and research methods including design of experiments,						
1	Apply research-based knowledge and research methods including a supply research based knowledge and research methods including a supply analysis and interpretation of data pertaining to Electronics & Communication Engineering						
	analysis and interpretation of data pertaining to Electronics &						
PO4	problems and arrive valid conclusions.						
	Modern tool usage: An ability to use the techniques, resources and modern engineering tools necessary for						
DO#	An ability to use the techniques, resources and modeline engineering modeling the complex system design in Electronics and Communication Engineering						
PO5	modeling the complex system design in Electronics and system design in Electronics and						
	The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety,						
	Apply reasoning informed by the contextual knowledge to assess the state of the professional legal and cultural issues and the consequent responsibilities relevant to the professional						
DO (legal and cultural issues and the consequent responsionates						
PO ₆	1 / 1.11.4						
	Environment and sustainability: An Ability to Understand the impact of the professional engineering solutions in societal and						
	An Ability to Understand the impact of the professional engineering environmental contexts, and demonstrate the knowledge of need for sustainable						
DO=	environmental contexts, and demonstrate the knowledge of the						
PO7	development.						
	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of						
200	Apply ethical principles and commit to professional carros areas						
PO8	The second secon						
	Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in						
DO 0	Function effectively as all illuvidual, and as a memory						
PO9							
	Communication: Communicate effectively in both verbal and written forms such as, being able to comprehen make effective presentations, and give						
	Communicate effectively in both verbal and written forms seen as, so and give and write effective reports and design documentation, make effective presentations, and give						
DO1	and write effective reports and design documentary						
POI	and receive clear instructions.						
	Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles						
	Demonstrate knowledge and understanding of the engineering data to a projects in and apply these to one's own work, as a member or a leader in a team, to manage projects in						
DO1	and apply these to one's own work, as a memory						
POI	1 multidisciplinary environments.						
	Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and						
DO1							
POI	1 Light and Lightronics and Collins Linguistics						
1	An ability to get an employment in Electronics and Communications like and related industries and to participate & succeed in competitive examinations like						
	land related industries and to participate & succeed in competation						
	and related American						
PSC	GRE, GATE, TOEFL, PSUs, etc.						
	GRE, GATE, TOEFL, PSUs, etc. Should be able to design and test various electronic systems that perform analog and digital processing functions.						

HEAD OF THEODEECEMENT ELECTRONICS & COMMUNICATION INGINEERING SV COLLEGE OF ENGINEERING KARAKAMBADI ROAD, TIRUPATI-517 507

SRI VENKATESWARA COLLEGE OF ENGINEERING Karakambadi Road, Opposite LIC Training Centre, Tirupati – 517 507. Department of Electronics and Communication Engineering

S. No	COURSE NAME	COs	COURSE OUTCOMES Solve the system of linear equations and reduce the quadratic forms to canonical form by
5.140	COCCA	C111.1	applying matrices.
		C111.2	Apply mean value theorems to solve real valued functions
1	& CALCULUS (MA20ABS101)	C111.3	Familiarize with functions of several variables which is useful in optimization
		C111.4	Apply multiple integrals to find the area and volumes for different functions
		C111.5	Analyze the concepts of Beta and Gamma special function for different functions
-		C112.1	Analyze the intensity variation of light due to Interference, diffraction and polarization.
	1	C112.2	Distinguish the types of lasers and apply its principles in modern technology.
2	APPLIED PHYSICS	C112.3	Analyze the concept of dielectric and magnetic materials for potential applications in the emerging micro devices.
_	(PH20ABS103)	C112.4	Apply the fundamentals of quantum mechanics and their applications to study the commentations are study the commentations and their applications to study the commentations are study the commentations and their applications to study the commentations are study to the commentation of the commentations are study the commentations are study to the commentation of the commenta
		C112.5	Apply the basic concepts of semiconductor and superconductivity in Engineering
		C113.1	applications. Understand the context, topic, and pieces of specific information from social or transactional dialogues spoken by native speakers of English. (L2)
	-	C113.2	Apply grammatical structures to formulate sentences and correct word forms. (L3)
3	COMMUNICATIVE ENGLISH	C113.3	Analyze discourse markers to speak clearly on a specific topic in informal discussions. (L4)
3	(EG20AHS101)	C113.4	Evaluate reading/listening texts and to write summaries based on global comprehension of these texts. (L5)
	4	C113.5	Create a coherent paragraph interpreting a figure/graph/chart/table. (L6)
		C114.1	Given a network, able to find equivalent impedance by using network reduction techniques and determine the current through any element and voltage across and power through any
		C114.2	Given a circuit and the excitation, determine the real power, reactive person, person and the excitation, determine the real power, reactive person, person and the excitation, determine the real power, reactive person, person and the excitation and the excitation are the real power, reactive person and the excitation are the real power, reactive person are the real power are the real power are the real person are the real power are the real person are the re
	FUNDAMENTALS OF ELECTRICAL	C114.3	Apply the network theorems suitably to analyze complex circuits and determine the effective voltages and currents in the circuit. (L6)
4	CIRCUITS (EE20AES103)	C114.4	Determine the Dual of the Network, develop the Cut Set and Tie-set Mannes
		C114.5	Circuit. (L5) Analyze the three-phase balanced and unbalanced circuits and to measure active and reactive powers in three phase circuits. (L5)
		C115.1	besis geometrical constructions, curves used in engineering practices. (L1)
	,	C115.2	Understand the concept of projection and acquire visualization skills, projection of points,
_	ENGINEERING DRAWING	C115.3	Lines and Francis. (22)
5	(ME20AES102)	C115.4	Leasthe coational views of right regular solids.(L3)
		C115.5	C. Corresponded (13)
×		C116.1	related to projections of Lines, Planes. (L1)
		C116.2	e la company de la projections of Planes. (L1)
	ENGINEERING GRAPHICS LA		the views of simple objects. (L3)
6	(ME20AES103)		in a continuo of simple solids. (L3)
		C116.	I comprehend with drafting packages for engineering practice. (L2)
		2.1.0	.1 Apply skill to find the wavelength of spectral lines using plane diffraction grating

S. No	COURSE NAME	COs	COURSE OUTCOMES
		C117.2	Analyze the usage of dielectric materials applications.
7	APPLIED PHYSICS LAB (PH20ABS104)	C117.3	Apply the concept of hysteresis curve of a ferromagnetic material to know the strength of magnetic material.
		C117.4	Analyze the working principles of semiconducting devices to study the applications of semiconducting technology.
		C117.5	Differentiate the patterns of spectrums using interference and diffraction phenomena.
	COMMUNICATIVE ENGLISH LAB (EG20AHS101)	C118.1	Develop to handle and excel in a variety of self-instructional, learner-friendly modes of language learning. (L6)
		C118.2	Develop to employ better stress and intonation patterns and utter English sounds correctly. (L6)
8		C118.3	Develop to avoid the impact of mother tongue in English and neutralize their accent. (L6)
		C118.4	Develop to participate with skill and confidence in Group Discussions, Interviews and Public Speaking. (L6)
		C118.5	Utilize the technical skills to prepare resume, report-writing, and formatmaking etc. (L3)
	FUNDAMENTALS OF ELECTRICAL	C119.1	Distinguish analogy between electric and magnetic circuits and apply the principles to determine circuit parameters. (L5)
9	CIRCUITS LAB	C119.2	Remember, understand and apply various theorems and verify practically. (L5)
	(EE20AES104)	C119.3	Understand and analyze active, reactive power measurements in three phase balanced & unbalanced circuit (L5)
		C11A.1	Demonstrate knowledge basic mathematics to develop analytical skills to solving problems of Averages - Percentages - Ratio. (L2)
	LOGICAL SKILLS	C11A.2	Demonstrate knowledge basic mathematics to develop analytical skills to solving problems of Partnership - Simple Interest and Compound Interest and time and distance. (L2)
10	FOR PROFESSIONALS (MA20AMC102)	C11A.3	Demonstrate knowledge basic mathematics to develop analytical skills to solving problems of time ad work, problems on trains and Boats and streams. (L2)
		C11A.4	Analyze the techniques in series, coding and decoding and blood relations. (L3)
		C11A.5	Analyze the techniques in directions, problems on ages and analogy. (L3)
	DIFFERENTIAL EQUATIONS AND VECTOR CALCULUS (MA20ABS201) CHEMISTRY (CH20ABS103)	C121.1	Solve the differential equations related to various engineering fields
		C121.2	Solve the linear differential equations of higher order related to various engineering fields
11		C121.3	Identify solution methods for partial differential equations that model physical processes
		C121.4	Interpret the physical meaning of different operators such as gradient, curl and divergence
		C121.5	Estimate the work done against a field, circulation and flux using vector calculus
		C122.1	Categorize the different problems present in the water and usage of technology to improve the quality of water.
		C122.2	Compare octahedral and tetrahedral complexes in crystal field theory and develop knowledge on super capacitors ,semi conductors, nanomaterials.
12		C122.3	Apply the basic concepts of electro analytical techniques that facilitate rapid and reliable measurements
		C122.4	Distinguish polymerization reactions with mechanisms and their applications.
41		C122.5	Use the principle of instrumentation to analyze the chemical and biological components.
	PROBLEM SOLVING USING C (CS20AES101)	C123.1	Solve computational problems (L3).
13		C123.2	Select the features of C language appropriate for solving a problem (L4)
		C123.3	Design computer programs for real world problems (L6)
		C123.4	Organize the data which is more appropriated for solving a problem (L6).
		C124.1	Understand principle of operation, characteristics and applications of Semi conductor diodes, Bipolar Junction Transistor and MOSFETs.
	ELECTRONIC	C124.2	Apply the basic principles for solving the problems related to Semiconductor diodes, BJTs, and MOSFETs.

S. No	COURSE NAME	COs	COURSE OUTCOMES
14 DEVICES AND CIRCUITS		C124.3	Analyze diode circuits for different applications such as rectifiers, clippers and clampers also analyze biasing circuits of BJTs, and MOSFETs.
	(EC20AES201)	C124.4	Design diode circuits and amplifiers using BJTs, and MOSFETs.
-		C124.5	Compare the performance of various semiconductor devices.
		C125.1	Identify tools, work material, measuring instruments useful for domestic applications (L3).
		C125.2	Apply wood working skills in real world applications. (L3)
		C125.3	Build different parts with metal sheets in real world applications. (L3)
		C125.4	Apply fitting operations in various applications for good strength. (L3)
	ENGINEERING	C125.5	Analyze different types of basic electric circuit connections. (L4)
15	WORKSHOP (ME20AES101)	C125.5	Demonstrate soldering and brazing in joining circuits. (L2)
		C125.6	Make moulds for sand casting using standard equipment. (L3)
		C125.7	Develop different weld joints for various metals. (L3)
		C125.8	Inspect various parts of machine components. (L4)
		C125.9	Make plastic components using proper raw material. (L3)
		C126.1	Identify the Internal parts of computers and Generation of Computers. (L1)
		C126.2	Assemble and disassemble a computer from its parts and prepare the computer ready to use.(L3)
	IT Workshop (CS20AES103)	C126.3	Installation process of different types Operating system for a computer by their own.(L3)
16		C126.4	Interconnect two or more computers for information sharing (L4)
		C126.5	Access the Internet and browse it for required information.(L1)
		C126.6	Prepare the documents using Word Processor, prepare spread sheets for calculations using Excel, and documents for LaTeX.(L3)
		C126.7	Prepare slide presentation using the presentation tool.(L4)
		C127.1	Build algorithm and flowchart for simple problems.
	PROBLEM SOLVING USING C	C127.2	Use suitable control structures to solve problems.
17		C127.3	Use suitable iterative statements, arrays and modular programming to solve the problems
	LAB (CS20AES102)	C127.4	Implement Programs using pointers and String handling Functions.
		C127.5	Develop code for complex applications using structures, unions and file handling features
		C128.1	Demonstrate electro-analytical techniques for the chemical analysis.
	CHEMISTRY LAB	C128.2	Apply Beer-Lambert Law to know the concentration of unknown samples
18	(CH20ABS104)	C128.3	Analyze the quality and quantity of chemical compounds in given samples.
		C128.4	Prepare different types of polymers.
		C129.1	Understand the basic characteristics and applications of basic electronic devices. (L1)
	ELECTRONIC	C129.2	Observe the characteristics of electronic devices by plotting graphs.(L2)
19	DEVICES & CIRCUITS LAB	C129.3	Analyze the Characteristics of UJT, BJT, MOSFET (L3).
	(EC20AES202)	C129.4	Design MOSFET/BJT based amplifiers for the given specifications. (L4)
		C129.5	Simulate all circuits in PSPICE/Multisim. (L5).

S. No	COURSE NAME	COs	COURSE OUTCOMES
	ENVIRONMENTAL	C12A.1	Understand the concepts of environment and natural resourses.
		C12A.2	Classify the types of ecosystems and conservation methods of bio-diversity
20	SCIENCE (CH20AMC201)	C12A.3	Identify the causes and problems of pollution in their real life situations
	(0002011110201)	C12A.4	Develop awareness on social issues such as global warming, acid rains,ozone layer depletion and sustainalibility.
		C12A.5	Determine the consequences of population exploitation in detail.
		C12B.1	Improve the neutral accent and be free from mother tongue influence. (L6)
21	SPEECH AND ORAI	0	Hypothesizing small talks on general topics and learn critiquing skills by participating in Conversations. (L6)
21	(EG20AMC103)	C12B.3	Applying Vocabulary and using it in their day-to-day life. (L4)
		C12B.4	Understanding and mastering in verbal and non-verbal communication. (L2)
		C211.1	Apply Cauchy-Riemann equations to find the analyticity of complex functions
		C211.2	Apply CauchY integral formula and Cauchy Integral theorem to evaluate improper integrals
	COMPLEX		along contours
22	VARIABLES AND TRANSFORMS	C211.3	Analyze the concepts of Laplace Transforms to solve ordinary differential equations
	(MA20ABS302)	C211.4	Examine the Fourier series for different functions in half and full range
		C211.5	Analyze the concepts of Z transforms to solve Difference equations
		C211.6	Analyze the concepts of Z transforms to solve Difference equations.(L4)
	DIGITAL LOGIC DESIGN	C212.1	Understand the properties of Boolean algebra, other logic operations, and minimization of Boolean functions using Karnaugh map.
		C212.2	Make use of the concepts to solve the problems related to the logic circuits.
23		C212.3	Analyze the combinational and sequential logic circuits.
	(EC20APC301)	C212.4	Compare various Programmable logic devices.
		C212.5	Compare the concepts of RAM and ROM.
		C212.6	Understand the operation CMOS, TTL logic families, ECL logic families and interfacing between them.
		C213.1	Understand the working principle of multistage amplifiers, Feedback amplifiers, power amplifiers and tuned amplifiers. (L2)
	ELECTRONIC	C213.2	Analyze multistage amplifiers, feedback amplifiers, power amplifiers, and tuned amplifiers. (L4)
24	CIRCUIT ANALYSIS & DESIGN	C213.3	Design multistage amplifiers, feedback amplifiers, oscillators, power amplifiers and tuned amplifiers for the given specification.(L6)
	(EC20APC302)	C213.4	Evaluate the efficiency of large signal (power) amplifiers. (L5)
		C213.5	Compare the frequency response of Single-stage, Double-stage amplifiers with Single tuned, double tuned and Stagger tuned amplifiers. (L2)
		C214.1	Understand the mathematical description and representation of continuous stime and the
	SIGNAYOO	C2142	time signals and systems. Also understand the concepts of various transform techniques. (L2) Apply sampling theorem to convert continuous-time signals to discrete-time signals and
25	SIGNALS & SYSTEMS (FC20APC202)	C214.3	reconstruct back, different transform techniques to solve signals and system related Analyze the frequency spectra of various continuous-time signals using different transform methods. (L4)
	(EC20APC303)		Analyze the systems based on their properties and determine the response of them. (L4)
		C214.5	Analyze the frequency spectra of various discrete-time signals using different transform methods. (L4)
			Should be able to understand managerial economics and demand analysis.
	MANAGERIAL		and defining analysis.
	MANAGERIAL ECONOMICS AND	C215.2	Should be able to analyze decisions relating to production and cost analysis.

		C312.1	band digital modulation Understand the concepts of geometric representation of signals, basics of information theory
	(EC20APC502) DIGITAL	C312.2	and error correcting codes
47	COMMUNICATION S	C312.3	Apply the knowledge of signals and system & statistical theory to evaluate the performance of digital communication systems
	~	C312.4	Analyze the different coding, modulation techniques, Probability of error performance of digital system.
		C312.5	Compare the performance of different modulation schemes& error correcting codes.
		C313.1	Demonstrate ability to understand the architecture of 8086 microprocessor.
	(EC20APC503) MICROPROCESSO	C313.2	Demonstrate ability to develop 8086 assemble language programming using assembly language programming in MASM/TASM.
48	RS AND MICROCONTROLL	C313.3	Demonstrate ability to describe interfacing of peripheral devices with 8086
	ERS	C313.4	Demonstrate ability to understand the architecture and addressing modes of 8051 microcontroller
		C313.5	Demonstrate ability to understand the hardware features of 8051 and interfacing with pushbutton switches, LED, LCD, Stepper motor, Seven Segment Display., etc.
		C314.1	Understand the basics of instructions sets and their impact on processor design.
	(CS20AOE502)	C314.2	Demonstrate an understanding of the design of the functional units of a digital computer system.
49	COMPUTER ARCHITECTURE &	C314.3	Evaluate cost performance and design trade-offs in designing and Constructing a computer processor including memory.
	ORGANIZATION	C314.4	Design a pipeline for consistent execution of instructions with minimum hazards
		C314.5	Recognize and manipulate representations of numbers stored in digital computers.
	(EE20APE502) CONTROL SYSTEM ENGINEERING	C315.1	Understand the concepts of control systems classification, feedback effect, mathematical modelling, and and state space analysis. Apply the concepts of Block diagrams and state space analysis.
		C315.2	Analyse time response analysis, error constants, and stability characteristics of a given mathematical model using different methods.
50		C315.3	Apply the concepts of RH and Root locus for stability calculations
		C315.4	Analyze system behavior of the system in frequency domain. frequency response characteristics, Design and develop different compensators. Bode, Nyquist, Polar plots for
		C315.5	Analyze system behavior based on the state space analysis of that system. controllability and observability
		C316.1	Understand real time behavior of different digital modulation schemes and technically visualize spectra of different digital modulation schemes.
51	(EC20APC504)DIGIT AL	C316.2	Design and implement different modulation and demodulation techniques.
	COMMUNICATION S LAB	C316.3	Analyze digital modulation & demodulation techniques
		C316.4	Simulate all digital modulation and demodulation techniques in MATLAB.
		C317.1	Demonstrate ability to handle arithmetic and Logical operations using assembly language programming in MASM/TASM.
	(EC20APC505)MICR	C317.2	Demonstrate ability to handle string instructions using assembly language programming in MASM/TASM.
52	OPROCESSORS	C317.3	Demonstrate ability to handle sorting operations and using assembly language programming in MASM/TASM
	AND MICROCONTROLL ERS LAB	C317.4	Demonstrate ability to handle Arithmetic and Logical operations using 8051 trainer kits.
	EKS LAB	C317.5	Demonstrate ability to handle sorting operations using 8051 trainer kits.
	,	C317.6	To interface the Microprocessor/Microcontroller with various peripherals for various applications.
			Learn how to design schematic and layout using PCB.
		C318.2	Design and implement experiments using PCB
53	(EC20ASC501) PCB DESIGN AND		Test and analyze the working of PCB.
55	PROTOTYPE DEVELOPMENT		Identify different components required in PCB Design.
	DEVELOPMENT	C310.4	Paramo required in 1 CD Design.

S. No	. No COURSE NAME		COURSE OUTCOMES
	,	C318.5	Aware of PCB Making Process.
		C318.6	Able to design different circuits using design tools.
>		C319.1	Understand historical background of the constitution making and its importance for Building a democratic India
		C319.2	Understand the functioning of three wings of the government ie., executive, legislative and judiciary
54 C	(BA20AMC501) ONSTITUTION OF	C319.3	Understand the value of the fundamental rights and duties for becoming good citizen of India.
	INDIA	C319.4	Analyze the decentralization of power between central, state and local self-government
-		C319.5	Apply the knowledge in strengthening of the constitutional institutions like CAG, Election Commission and UPSC for sustaining democracy.
		C31A.1	Solve computational problems (L3).
	(IT20AMC501) PROBLEM	C31A.2	Select the features of C language appropriate for solving a problem (L4)
55	SOLVING AND PROGRAMMING	C31A.3	Design computer programs for real world problems (L6)
-		C31A.4	Organize the data which is more appropriated for solving a problem (L6).
	7	C31B.1	Interpret the recent technological updations.
	EC20ATS501)Techni	C31B.2	Prepare Presentation and seminar report on the specified technical topic.
56	cal Seminar Presentation-I	C31B.3	Develop knowledge, presentation and communication skills.
		C31B.4	Defend or convince the audience during viva process.
4	(EC20AIP501)Evalua tion of Summer Internship	C31C.1	Identify and grab the internship opportunity.
		C31C.2	Develop the skills required for doing the assigned project work.
57		C31C.3	Apply the skills and use the modern tools for implementing the assigned project work.
		C31C.4	Observe the work environment and learn the work culture.
		C31C.5	Develop presentation and interpersonal communication skills through presentations and documentation.
		C321.1	Design & Implementation of IIR filters using different techniques
	TC20 + PC(01) PICIT	C321.2	Design of FIR filters based on windowing methods
58	EC20APC601)DIGIT- AL SIGNAL	C321.3	Analyze DFT computation using fast algorithms.
	PROCESSING	C321.4	Analyse multi-rate signal processing techniques
	,	C321.5	Understanding the architecture details and instruction sets of fixed and Floating point DSP's
		C322.1	Analyze micro-wave circuits incorporating hollow, dielectric and planar waveguides, transmission lines, filters and other passive components, active devices.
	(EC20APC602)	C322.2	Understand microwave transmission lines and how to Use microwave components such as isolators. Couplers, Circulators, Tees, Gyrators etc
59	ENGINEERING AND	C322.3	Differentiate Linear bean tubes and crossed field tubes in terms of operation and performance
-		C322.4	Understand various types of fibers, modes, configurations and signal degradations
	79	C322.5	Analyze signal degradation in optical fibers and compare the performance of various optica sources and detectors.
		C323.1	Outline the processing steps in the fabrication of a nMOS, pMOS and CMOS structure.
		C323.2	Illustrate the Layout procedure of simple MOS circuit using Lambda based design
60	(EC20APC603) VLSI DESIGN	C323.3	Summarize the scaling effects of various key parameters of MOSFET devices
		C323.4	Design various MOS based logic circuits.

		C32B.4	Defend or convince the audience during viva process.
		C32C.1	Demonstrate various AI applications, languages and Intelligent Agents.
	(AM20AMC601) AI TOOLS	C32C.2	Solve problems using search strategies and understand the basic process of Machine Learning. CO3: Apply classification and regression algorithms on real world data.
	TECHNIQUES & APPLICATIONS	C32C.3	Develop an expert system.
	ATTERCATIONS	C32C.4	Comprehend the structure of an artificial neural network and identify the building blocks of a convolutional neural network.
69		C411.1	Apply the boundary conditions of the rectangular, circular waveguides and cavity resonators to solve for field expressions in waveguides.
	Microwave	C411.2	Analyze different microwave passive devices and derive their scattering matrices.
70	Engineering and	C411.3	Differentiate Linear beam tubes and cross field tubes in terms of operation and performance
70	Communications	C411.4	Understand various types of fibers, modes, configurations and signal degradations.
		C411.5	Understand the propagation and principle of operation of optical sources and detectors.
			Understand CMOS fabrication process, design rules and apply the concepts to draw the
	1	C412.1	layout and stick diagrams of given logic circuits. Analyze technology scaling, sheet resistance, capacitance and propagation delays in CMOS
	VLSI Design	C412.2	circuits. Analyze the behaviour of MOSFET amplifier circuits with various loads.
71	(19A04702T)	C412.3	Design MOSFET based logic circuits using various logic styles like static and dynamic
		C412.4	CMOS. Analyze the various design for testability methods for combinational & sequential CMOS
		C412.5	Circuits.
	Image Processing (19A04703d)	C413.1	Analyze various types of image fundamentals mathematically.
		C413.2	Compare image enhancement methods in spatial and frequency domains.
72		C413.3	Demonstrate various segmentation algorithms for given image.
		C413.4	Justify DCT and wavelet transform techniques for image compression and standards.
		C413.5	Describe various color models for color image processing.
	8	C414.1	Summarize the threats, vulnerabilities related to computer security
	The second	C414.2	Determine the attacks on web data
73	Cyber Security	C414.3	Analyze the security tools and techniques for cloud computing
73	(19A05704b)	C414.4	Evaluate the need for privacy and its impact on emerging technologies
		C414.5	Categorize the legal issues and ethical issues in computer society
		C415.1	Understand the concepts & principles of management and designs of organization in a
			Apply the knowledge of Work-study principles & Quality Control techniques in industry
	Management Science	C415.2	Analyze the concepts of HRM in Recruitment, Selection and Training & Development
74	(19A52701b)	C413.3	Evaluate PERT/CPM Techniques for projects of an enterprise and estimate time, cost of
		C415.4	project & to analyze the business through SWO1
		C415.5	Create Modern technology in management science. Understand the mode characteristics of Reflex Klystron oscillator and negative resistant
		C416.1	characteristics of Gunn Oscillator. Determine the VSWR and Impedance of an unknown load connected at the end of the b
		C416.2	setup.
	Microwave and Optical	C416.3	theoretically. Also determine numerical aperture and bending losses of a given optical fi

S. No	COURSE NAME	COs	COURSE OUTCOMES	
75	Communications Lab (19A04701P)	C416.4	Analyze the radiation characteristics to find the directivity and HPBW of a given antenna.	
	(1511011,011)	C416.5	Establish optical link between transmitter and receiver experimentally to find attenuation and signal strength of the received signal.	
		C416.6	Understand the DC characteristics of LED and Photo diode.	
		C417.1	Develop HDL source code for the given problem/experiment.	
		C417.2	Simulate the given circuit with suitable simulator and analyze the results.	
76	VLSI Design Lab (19A04702P)	C417.3	Understand how to use FPGA hardware tool and Cadence tool.	
		C417.4	Design the circuit and implement using Cadence tool.	
	Ser .	C417.5	Analyze the waveforms and layout diagram.	
		C418.1	Identify and grab the internship opportunity.	
-	Industrial	C418.2	Develop the skills required for doing the assigned project work.	
77	Training/Skill Development/Researc	C418.3	Apply the skills and use the modern tools for implementing the assigned project work.	
1 3	h Project (19A04705)	C418.4	Observe the work environment and learn the work culture.	
		C418.5	Develop presentation and interpersonal communication skills through presentations and documentation.	
	Advanced 3G and 4G Wireless Mobile Communications (19A04801a)	C421.1	Understand the concepts of wireless communications and standards	
		C421.2	Apply a wireless technique to solve engineering problem	
78		C421.3	Analyze working of wireless technologies	
		C421.4	Evaluate a wireless technique in a given situation	
		C421.5	Plan a wireless system for deployment	
	IoT Applications in Electrical Engineering (19A02802a)	C422.1	To get exposed to recent trends in few applications of IoT in Electrical Engineering	
		C422.2	To understand about usage of various types of motionless sensors	
79		C422.3	To understand about usage of various types of motion detectors	
		C422.4	To get exposed to various applications of IoT in smart grid	
		C422.5	To get exposed to future working environment with Energy internet	
		C423.1	Identify the socially relevant problems and define the problem statement.	
	(8)	C423.2	Analyze and categorize executable project modules by applying acquired knowledge and skills with due consideration of constraints.	
	9	C423.3	Use efficient resources/IT tools for designing project modules.	
		C423.4	Combine all the modules through effective team work after efficient testing and simulation.	
80	Project (19A04803)	C423.5	Improve the team building, communication and management skills.	
		C423.6	Elaborate the completed task and demonstrate working of the model/module in most convincing manner.	
		C423.7	Compile the project report with appropriate writing skills.	
		C423.8	Predict the consequences of developed model in terms of safety, health hazards and ensure ethical values	
		C423.9	Verify the scope of transforming model/module into marketable product through proper financial management.	

HEAD OF THE DEPARTMENT
ELECTRONICS & COMMUNICATION ENGINEERING
SV COLLEGE OF ENGINEERING
KARAKAMBADI ROAD, TIRUPATI-517 507

DEPARTMENT OF MANAGEMENT STUDIES

MBA 2022-23

R20 Regulation

PROGRAM OUTCOMES

- a. Equip with advanced business acumen that helps them to understand the key business functions and organizational resources for efficient business management.
- b. Familiarize themselves with financial concepts, analysis and reporting systems.
- c. Apply technology to enhance organizational efficiency and create innovative business solutions.
- d. Identify customer needs and to participate in the process of developing products and services to meet their requirements.
- e. Demonstrate the ability to analyze complex, unstructured qualitative and quantitative problems by collecting, analyzing data by using accounting, financial, mathematical, statistical tools, information and communication technologies to solve the complex business problems.
- f. An ability to understand the impact of Managerial solutions in a global, economic, environmental, and societal context.
- g. Familiarize with social responsibility issues that managers must address, including business ethics, cultural diversity, and environmental concerns.
- h. An understanding of professional, ethical, legal, financial, marketing, sales, logistical security and social issues and responsibilities.
- i. Acquire leadership skills, understand group and individual dynamics, and be able to work in teams.

- j. An ability to communicate effectively, both in writing and orally.
- k. Apply conceptual business foundations to solve practical decision-making problems, both individually and as part of teams using techniques such as case analysis, projects and assignments.
- 1. Exhibit business-related behavioral skills including leadership, interpersonal, communication (written and oral), team, and lifelong learning skills

Semester III

Course Objectives

Innovation and Entrepreneurship Development

- CO1: To know the significance of innovation and entrepreneurship.
- CO2: To get clarity about institutions supporting business businesses.
- CO3: To know the various aspects and phases of a project proposal.
- CO4: To introduce the business model and business plan.
- CO5: To learn about the challenges faced by women entrepreneurs.

Green Business Management

- CO1: To know the significance of Green Business and its relevancy to 21st Century.
- CO2: To understand Corporate structure and Corporate Environmental Responsibility.
- CO3: To provide knowledge on Sustainable Development and Diversity
- CO4: To introduce the Environmental Reports 1440.
- CO5: To learn about Eco- friendly Designs and E- Commerce models.

Cost and Management Accountancy

CO1: To acquire knowledge and understanding of the concepts, techniques and practices of cost and management accounting

CO2: To develop Cost analytical skills for decision-making in Materials Control.

CO3: To know how to control Labour costs by Time-Keeping and Time Booking, efficiency Rating Procedures; Remuneration Systems and Incentive Schemes.

CO4: To Study the difference between management accounting and cost accounting and financial

CO5: To Analysis and Interpretation of Financial Statements and To practice the recent Trends in Presenting Financial Statements.

Product and Brand Management

CO1: To understand the classification of Products, Product Mix and Product Line.

CO2: To get insight about the new Product Development and Product Positioning Strategies.

CO3: To focus on the Brand loyalty, Brand Valuation and Brand Positioning.

CO4: To gain the knowledge of the brand equity and Brand extension.

CO5: To learn the Brands in banking sector, insurance sector and service sector.

Human Resource Development

CO1: To understand the significance of Human Resource Development.

CO2: To learn about the need of the Training and Development Programs.

CO3: To gain the knowledge of the implementation and evaluation of the HRD Programs.

CO4: To get knowledge on focusing on Career Development.

CO5: To get insight about diversity of culture and demographic changes.

Mobile Commerce

consumer behaviour

CO1: To provide knowledge on trends in Mobile Commerce with different electronic devices.

CO2: To learn about data base transactions access comprehensively.

CO3: To manage interactions between mobile application users and business men.

CO4: To get knowledge on Mobile Ticketing, computing and payment.

CO5: To understand the mobile commerce portals and their services.

FINANCIAL INSTITUTIONSAND SERVICES

CO1: To understand the role and functions of RBI

CO2: To enrich the knowledge of structure and performance of banking and non-banking institutions.

CO3: To equip the information of instruments in primary and secondary market.

CO4: To know about venture capital financing.

CO5: Become aware of challenges faced by the investment bankers.

CONSUMER BEHAVIOUR

CO1: understand consumers, market segments, strategies and psychological dimensions CO2:To know economic demographic, cross culture, socio culture, reference group, family influence of

CO3: Enumerate designing persuasive communication, diffusion of innovation and its models.

CO4: Familiarise the student with high and low involvement, brand loyalty and repeat purchase behavior of consumer

CO5: Become aware of consumer protection act 1986, consumer disputes redressal agencies and commissi

LABOR LAWS AND LEGISLATIONS

- CO1. Develop a comprehensive understanding of the evolution of labor laws in India, exploring their significance, relevance to HRM, and implications within the legal framework.
- CO2. Acquire an in-depth understanding of key legislations governing employment and working conditions in India.
- CO3. Develop a comprehensive understanding of the legal provisions governing remuneration, to ensure adherence and fair practices in compensation management.
- CO4. Gain an in-depth comprehension of laws concerning industrial relations, to effectively navigate and manage workplace dynamics while ensuring legal compliance and harmonious labor relations.
- CO5. Develop a comprehensive understanding of laws pertaining to social security, to ensure effective implementation and compliance with provisions aimed at safeguarding employee welfare and security.

Supply Chain Management

CO1: Understand the role of distribution logistics in value discovery within the supply chain framework.

CO2: Identify core processes within an organization and evaluate whether they should be internally produced or outsourced to external suppliers.

CO3: Analyze the value addition potential of different distribution strategies, such as direct shipping, cross-docking, and consolidation centers.

CO4: Explore risk pooling strategies to mitigate supply chain uncertainty and reduce overall inventory costs through aggregation and centralized inventory management.

CO5: Evaluate the value of information in supply chain management, including its role in reducing the bullwhip effect, improving forecasting accuracy, and enhancing decision-making.

Investment and portfolio management

CO1: To understand the objectives of investment and process of investment.

CO2: To learn about the fundamental analysis and technical analysis.

CO3: To gain the knowledge of the classification of risk and risk factors.

CO4: To focus on the types of securities and valuation of securities.

CO5: To get insight about the process of portfolio management and portfolio models.

Retail Management

CO1: To provide a comprehensive overview of retail management, encompassing key concepts and practices.

CO2: To explore the critical factors and methodologies involved in selecting optimal retail store locations.

CO3: To delve into the principals and techniques of merchandise management and planning, aiming to optimize inventory assortment, pricing and allocation strategies

CO4: To examine the role of information technology and systems in retail with a focus on enhancing operational efficiency customer experience and decision making process within retail organizations.

CO5: To understand the dynamics of the Indian retail market and develop strategies to effectively meet consumer needs.

Performance Management

CO1: To Provide Knowledge on Performance management through different methods

CO2: To enable the students to understand the benefits of mentoring and Competency map

CO3: To understand the importance of Coaching and Counseling in Performance Management

CO4: To understand different performance methods for reward

CO5: To get comprehensive understanding on learning approaches and fringe benefits

Enterprise Resource Planning

CO1: To know the Fundamentals and Overview of Enterprise Resources Planning

CO2: To Know about the concepts of Data Mining and Data Warehousing

CO3: To understand the various modules of ERP this is used in Organization

CO4: To get clarity how to Implement Various ERP Modules in organization

CO5: To know the ERP Products and its Impact

MERGERS & ACQUISITION

CO1: Acquire conceptual knowledge in ethical issues of Mergers & Acquisition.

CO2: To Know about strategic approaches in value creation and merger negotiations.

CO3: To evaluate the defensive tactics and leverage buyouts.

CO4: Become aware of SEBI guidelines for takeovers, buyback of securities and ESOP.

CO5: To understand opportunities and threats of cross border Mergers & Acquisition.

ADVERTISING AND SALES PROMOTION MANAGEMENT

CO1: Should be able to understand advertising strategies in different sectors. Should be able to understand the roles of ad managers.

CO2: Should be able to perform the functions of advertising agencies

CO3: Should be able to apply different pre-testing and post testing advertising methods.

CO4: Should be able to apply different sales promotion strategies.

CO5: Should be able to perform the roles of public relations officer. Should be able to understand the power of publicity.

KNOWLEDGEMANAGEMENT

CO1: To understand the design and the clear concepts of knowledge management

CO2: To equip the knowledge of life cycle of knowledge management in an organization

CO3: To have a clear understanding about the road map of knowledge management and information architecture

CO4: To entail basic knowledge of information technology in knowledge management systems.

CO5: To perceive the concept of knowledge management in manufacturing and service industry.

Data Ware Housing and Mining

CO1: To understand data mining and data ware housing concepts

CO2: To know the context of Data Ware House

CO3: To know the data ware house structures related to organization

CO4: To Analyzing the Contexts of the Data warehouse

CO5: To know how to Getting Data into the Data warehouse

Business Ethics and Corporate Governance

CO1: Should be in a position to differentiate Business ethics from General ethics

CO2: Will be in a position to make decisions out of ethical dilemma's

CO3: Will be aware of corporate governance philosophies, structure, Directors Role etc.

CO4: Will be having awareness over corporate social responsibility of organizations.

CO5: Will be in a position to combat frauds happening in workplace

Semester IV Course Objectives

STRATEGIC MANAGEMENT

CO1: Should be in a position to differentiate strategic formation

CO2: Will be in a position to make decisions related to strategy implementation

CO3: Will be aware of Guidelines for proper control- Strategic surveillance -strategic audit etc.,

CO4: Will be having awareness over Strategy and Corporate Evaluation and feedback in the Indian and international context.

CO5: Will be in a position to implement the Tools and techniques

CO6: Will be in a position to perform the Strategic Management process

E- Business

CO1: Explore various electronic commerce models, including Business-to-Business (B2B), Business-to-Consumer (B2C), Consumer-to-Consumer (C2C), and others, analyzing their characteristics and functionalities.

CO2: Analyze the role of digital signatures and digital certificates in ensuring the authenticity, integrity, and non-repudiation of electronic documents and transactions.

CO3: Explore the concept of money in the digital age, understanding its evolution from physical currency to electronic forms and its role in facilitating transactions in the modern economy.

CO4: Examine strategies for conducting business over the web, including e-commerce platforms, digital marketing tactics, and customer relationship management (CRM) approaches, to capitalize on online opportunities and maximize business growth.

CO5: Analyze strategies for managing e-business applications infrastructure, including cloud computing, virtualization, and scalability solutions, to accommodate dynamic business demands and ensure high performance.

Financial Derivatives:

CO1: To know the Uses of Derivatives Markets and Basic knowledge of Derivatives: understand the basic concepts of derivative markets and its principles, by equip himself and able to work on i

CO2: To get clarity about to know the structure of forward and Future Markets and Mechanics of forward markets: identify the significant role of forward market, Terms and structure of forward market. Determination of forward prices

CO3: To study the Principles of Option Pricing Options: Distinguish between Options and Futures, Structure of Options Market, Principles of Option Pricing, Option Pricing Models: The Binomial Model, The Black – Scholes Merton Model.

CO4: To know the Option Pricing Models: The Binomial Model, The Black – Scholes Merton Model and To make aware of Basic Option Strategies

CO5: To know the basics of using Swaps to Manage Risk, Pricing and Valuing Swaps and Swaps: Concept and Nature, Evolution of Swap Market, Features of Swaps

Services Marketing

CO1: Understand the differences between a service and physical product, characteristics of services, marketing mix adapted for services and Services in modern economy

CO2: Understand the importance of customer expectations in services segment, Types of expectations

CO3: Understand to establish pricing objectives, Pricing of services, and Pricing strategies and putting them into practice

CO4: Understand Marketing communication and marketing communication mix

CO5: Understand the marketing planning process related to services, formulation and implementation of marketing strategy

Organization development

CO1: To understand the importance of Values and Ethics in the development of Organisation

CO2: To know the significance of Wave Management and Organisation Transformation

CO3: To understand the action research as process and approach of Organisation Development

CO4: To bring comprehensive understanding on Team intervention and Behaviour Models

CO5: To able to understand the system ramification and power politics and future Organization Development

DATA COMMUNICATION AND NETWORK ANALYSIS

CO1: To understand data communication network analysis, digital transmission, terminal handlines errors correction and coding.

CO2: To know simple protocols, virtual circuits and broadcasting algorithms

CO3: Become aware of flow control and buffering, synchronization and internet work fragmentation.

CO4: Familiarize the student network security and privacy, data encryption, authentication and digital signature.

CO5: Enumerate ISDN, TCP/IP and networking and Internetworking derives.

International Financial Management

- CO 1: To understand the nature and importance of International Financial Management and how it differs from Financial Management.
- CO 2: To gain knowledge about how the foreign exchange market works.
- CO 3: To have an insight into the management of foreign exchange exposure and risk.
- CO 4: To understand the mechanism of cross-border investment decisions.
- CO 5: To develop knowledge and skill towards financing decisions and working capital management of MNC's.

INTERNATIONAL MARKETING

- CO1: Should be in a position to differentiate international and domestic marketing
- CO2: Will be in a position to make decisions related to Indirect Exporting, Direct Exporting, Foreign Manufacturing Strategies
- CO3: Will be aware of New products in International Market
- CO4: Will be having awareness over Distribution Structures and Distribution Patterns
- CO5: Will be in a position to Selecting Foreign Country Market intermediaries
- CO6: Will be in a position to perform the Export Marketing

GLOBAL HUMAN RESOURCE MANAGEMENT

- CO1: Should be able to differentiate between domestic and global human resource management
- CO2: Should be able to understand different cross-cultural hofstede's dimensions and cultural issues.
- CO3: Should be able to understand the different recruitment and selection process of ghrm. Should be able to learn compensation structure of ghrm
- CO4: Should be able to understand the cross-cultural training and international training and development methods.
- CO5: Should be able to analyze the industrial relations, trade unions and collective bargaining. Should be able to gain knowledge on participative management about USA-European countries and Asain countries-Middle east

Corporate Information Management

- CO1: To provide knowledge on Information Technology and its application
- CO2: To get knowledge on collaboration of innovation and business network
- CO3: To ubnderstand the IT alignment and security and New Service Models
- CO4: To get knowledge on IT outsourcing and collaboration and implementation of IT Policy
- CO5: To analyze Project management, Technology Cycles and Role of Research and Development Policy.

PROGRAM SPECIFIC OBJECTIVES

PSO-1: Students will establish themselves as effective professionals by solving real problems through the use of management science knowledge and with attention to team work, effective communication, critical thinking and problem solving skills.

PSO-2: Students will develop professional skills that prepare them for immediate employment and for life-long learning in advanced areas of management and related fields.

PSO-3: Students will demonstrate their ability to adapt to a rapidly changing environment by having learned and applied new skills and new competencies.

PSO-4: Students will be provided with an educational foundation that prepares them for excellence, leadership roles along diverse career paths with encouragement to professional ethics and active participation needed for a successful career.

H.O.D., MBA

S.V. COLLEGE OF ENGINEERING
Karakambadi Road, TIRUPATI-517 507

- j. An ability to communicate effectively, both in writing and orally.
- k. Apply conceptual business foundations to solve practical decision-making problems, both individually and as part of teams using techniques such as case analysis, projects and assignments.
- 1. Exhibit business-related behavioral skills including leadership, interpersonal, communication (written and oral), team, and lifelong learning skills

MBA SEM-I COURSE OUTCOMES

Management and Organizational Behaviour

CO1: Should be able to perform roles of managers

CO2: Should be implement principles of management

CO3: Should be able to optimize organizational resources

CO4: Should be able motivate employees in an organization.

CO5: Should be able to reduce conflicts & Increase productivity.

CO6: Should be able to understand group behaviour & Individual behaviour.

Business Environment and Law

CO1: Outline how an entity operates in a business environment

CO2: Explain the clear cut study of Monetary, Fiscal and EXIM Policy

CO3: Explain the effects of Law of Contracts 1872

CO4: Provide students with a background of update of the Company's Act 1956.

CO5: Provide students with a background of update of the IT Act 2000.

Managerial Economics

CO1: Should be able to perform roles of managerial economist and Demand Analysis

CO2: Should be able to understand Production and Break- Even Analysis

CO3: Should be implement principles of Market Analysis

CO4: Should be implement principles of pricing strategies

CO5: Should be able to handle the inflationary measures and Trade Cycles

Financial Accounting for Managers

CO1: Should be able to understand the different concepts in accounting

CO2: Should be implement principles of accounting.

CO3: Should be able to perform roles of accountant.

CO4: Should be implement methods to calculate deprecation and inventory valuation.

CO5: Should be able to perform as accountant.

CO6: Should be able to forecast financial future.

CO7: Should be able to access and analyse balance sheet.

Statistics for Managers

CO1: To familiarize the students with the statistical techniques.

CO2: To develop the computational skill of the students.

CO3: To instill the managerial decision making capabilities in the students.

CO4: To enhance the analytical skills of students that helps them with sales projections.

Business Communication

CO1: To make student familiar with Channels of Communication

CO2: Students are able to understand types of Business Communication

CO3: Students are able to understand inter-personal Communication

CO4: To make students comfortable to understand Barriers of Communication

CO5: Students can understand how to write Report Writing

Information Technology for Managers

CO1: Ability to understand basic concepts of computer and acquires knowledge about information technology.

CO2: To understand the basic concepts, queries and the applications of database systems.

CO3: To apply Microsoft access, PowerPoint, word and excel applications to create personal, academic and business documents following current professional and/or industry standards.

CO4: To gain knowledge about data communication and networks and ability to configure a computer network logically.

Semester II

Course Objectives

Human Resource Management

CO1: Explain the importance of human resources and their effective management in organizations

CO2: Demonstrate a basic understanding of different tools used in forecasting and planning human resource needs

CO3: Describe the meanings of terminology and tools used in managing employees effectively

CO4: Record governmental regulations affecting employees and employers

CO5: Analyze the key issues related to administering the human elements such as motivation, compensation, appraisal, career planning, diversity, ethics, and training

Marketing Management

CO1: Use written formats to communicate marketing outcomes.

CO2: Analyze the relevance of marketing concepts and theories in evaluating the impacts of environmental changes on marketing planning, strategies and practices.

CO3: State the role and functions of marketing within a range of organizations.

CO4: Describe key marketing concepts, theories and techniques for analyzing a variety of marketing situations.

CO5: Demonstrate the ability to justify marketing strategies and advocate a strategically informed position when considering marketing plan implementation.

CO6: Manage themselves and members they work within a team when undertaking independent management study.

Business Research Methods

CO1: Should be able to take proper decisions based on collected information

CO2: Should be able to know about various methods of research

CO3: Should be able to know how to collect the data

CO4: Should be able to do Sampling and Survey research

CO5: Should be able to analyze the data statistically & give proper interpretations

CO6: Should be able to prepare the project reports

Financial Management

CO1: Should be able to understand the Need of finance in business

CO2: Should be implement principles of capital budgeting decisions in selection of proposals

CO3: Should be able to optimize share holders wealth for acquiring of cheaper source of capital

CO4: Should be able to understand the difference between operating profit and net profit

CO5: Should be able to forecast future estimated working capital according to demand

CO6: Should be able to assess the procedure of merging and distribution of shares

Operations Research

CO1: To provide the basic tools of operations research to students.

CO2: To enhance the mathematical approaching skill in management problems.

CO3: To develop problem solving &decision making skills that is useful in management of organizations

CO4: To solve the problems in defined steps, by mathematical analysis.

Operations Management

CO1: At the end of the course, a student will be able to:

CO2: Able to perform Production Planning.

CO3: Able to explain Production Controlling.

CO4: Able to focus on Plant Layout Types and their Suitability

CO5: Able to Managing Standard time of a work and Worker.

CO6: Able to Handle Materials Management Issues.

CO7: Able to draft Control Charts for Quality Management.

CO8: To Focus on Quality Management

Management Information Systems

CO1: Describe the role of information technology and information systems in business

CO2: Define the theoretical models used to construct databases

CO3: Develop an understanding of the principles in the System Development Life Cycle

CO4: Describe the concepts and vocabulary of e-commerce security

CO5: To gain knowledge about ERP, big data and cloud computing.

PROGRAM SPECIFIC OBJECTIVES

PSO-1: Students will establish themselves as effective professionals by solving real problems through the use of management science knowledge and with attention to team work, effective communication, critical thinking and problem solving skills.

PSO-2: Students will develop professional skills that prepare them for immediate employment and for life-long learning in advanced areas of management and related fields.

PSO-3: Students will demonstrate their ability to adapt to a rapidly changing environment by having learned and applied new skills and new competencies.

PSO-4: Students will be provided with an educational foundation that prepares them for excellence, leadership roles along diverse career paths with encouragement to professional ethics and active participation needed for a successful career.

S.V. COLLEGE OF ENGINEERING

Karakambadi Road, TIRUPATI-517 507

(Autonomous)

Karakambadi Road, Opposite LIC Training Centre. Tirupati – 517 507.

Accredited by NBA (B.Tech – CSE, ECE, EEE, Mech., Civil and IT) & NAAC with 'A' Grade Approved by AICTE, New Delhi permanently affiliated to JNTUA, Ananthapuram.

DEPARTMENT OF MCA

S. No	COURSE NAME	COs	COURSE OUTCOMES
		C111.1	Explain the organization of basic computer, its design & the design of control unit and trade-offs between hardware and software.
1	Computer Organization	C111.2	Students will formulate and solve problems, understand the performance requirement of the systems and the operations & languages of the register transfer, micro operations and inputoutput organization.
	(CA20FPC101)	C111.3	Students can understand how computer stores positive and negative numbers
		C111.4	Understand the organization of memory and memory management hardware.
		C111.5	Elaborate advanced concepts of computer architecture, Parallel Processing, inter- processor communication and synchronization.
		C112.1	Analyze the basic concepts of C Programming language.
		C112.2	Design applications in C, using functions, arrays, pointers and structures.
2	Data Structures Using C (CA20FPC102)	C112.3	Apply various operations of Stacks and Queues in solving the problems.
1		C112.4	Explain operations on Linked lists.
		C112.5	Demonstrate various tree traversals and graph traversal techniques.
	Database	C113.1	Design a database for a real-world information system
3	Database Management Systems (CA20FPC103)	C113.2	Define transactions which preserve the integrity of the database
	Systems (CAZOF I C103)	C113.3	Generate tables for a database

(Autonomous)

Karakambadi Road, Opposite LIC Training Centre, Tirupati – 517 507.

Accredited by NBA (B.Tech – CSE, ECE, EEE, Mech., Civil and IT) & NAAC with 'A' Grade Approved by AICTE, New Delhi permanently affiliated to JNTUA, Ananthapuram.

C113.4 Organize the data to prevent redundancy C113.5 Pose gueries to retrieve the information from database The student will be able to understand the basic accounting C114.1 principles Accounting and Financial Get exposure to the fundamental concepts, techniques and tools 4 C114.2 Management(BA20FHS101) of Financial Management, Enable to prepare and analyze financial statements of business C114.3 enterprises for taking sound financial decisions. Able to apply mathematical concepts and logical reasoning to Mathematical Foundations solve problems in different fields of Computer science and C115.1 for information technology. 5 **Computer Science** Able to apply the concepts in courses like Computer Organization, C115.2 DBMS, Analysis of Algorithms, Theoretical Computer Science, (CA20FPC104) Cryptography, Artificial Intelligence Ability to choose the transmission media depending on the C116.1 requirements. Computer Networks (6 C116.2 Ability to design new protocols for computer network. CA20FPC105) C116.3 Ability to configure a computer network logically. C117.1 Design database for any real world problem C117.2 Implement PL/SQL programs **Database Management** Systems Lab C117.3 Define SQL queries (CA20FPC106) C117.4 Decide the constraints C117.5 Investigate for data inconsistency C118.1 Demonstrate basic concepts of C programming language. Develop C programs using functions, arrays, structures and Data Structures Using C C118.2 8 pointers. Lab (CA20FPC107) C118.3 Illustrate the concepts Stacks and Queues. C118.4 Design operations on Linked lists.

(Autonomous)

Karakambadi Road, Opposite LIC Training Centre, Tirupati – 517 507.

Accredited by NBA (B.Tech – CSE, ECE, EEE, Mech., Civil and IT) & NAAC with 'A' Grade Approved by AICTE, New Delhi permanently affiliated to JNTUA, Ananthapuram.

		C118.5	Apply various Binary tree traversal techniques.
			Develop searching and sorting methods
		C119.1	Preparing a Govt. Order / Official Letter / Business Letter / Circular Letter Covering formatting commands - font size and styles - bold, underline, upper case, lower case, superscript, subscript, indenting paragraphs, spacing between lines and characters, tab settings etc.
		C119.2	Printing envelopes and mail merge. To print envelopes with from addresses and to addresses to use mail merge facility for sending a circular letter to many persons to use mail merge facility for printing mailing labels
9	Office Automation & Trouble shooting Lab (CA20FPC108)	C119.3	Create an advertisement Prepare a resume. Prepare a Corporate Circular letter inviting the shareholders to attend the Annual Meeting
		C119.4	Using formulas and functions: To prepare a Worksheet showing the monthly sales of a company in different branch offices (Showing Total Sales, Average Sales). Prepare a Statement for preparing Result of 10 students in 5 subjects (using formula to get Distinction, I Class, II Class and Fail under Result column against each student
		C119.5	Creating a Chart: To create a chart for comparing the monthly sales of a company in different branch offices.
		C119.6	Troubleshoot the following OS problems Unable to copy and paste Replacing Windows Splash Screens Out of memory error Windows cannot find Program.exe to open Windows Installer error
	Mandatory	C11A.1	Understand verbal and non-verbal features of communication and hold formal / informal conversations
10	Course(Corporate Communication Skills)	C11A.2	The significance of paralinguistic features will be understood by the students and they will try to be intelligible.
	(CA20FMC101)	C11A.3	Become good at Inter-personal skills

(Autonomous)

Karakambadi Road, Opposite LIC Training Centre, Tirupati – 517 507.

Accredited by NBA (B.Tech – CSE, ECE, EEE, Mech., Civil and IT) & NAAC with 'A' Grade Approved by AICTE, New Delhi permanently affiliated to JNTUA, Ananthapuram.

C11A.4 Achieve neutral accent and be free from mother tongue influence Being an active participant in debates and group discussion, C11A.5 showing ability to express agreement, argument to summarize ideas to elicit the views of others and present own ideas. C121.1 Able to use operating systems effectively. Write System and application programs to exploit operating C121.2 **Operating Systems** system functionality. 11 (CA20FPC201) C121.3 Add functionality to the exiting operating systems C121.4 Design new operating systems C122.1 Apply the features of Python language in various real applications. C122.2 Select appropriate data structure of Python for solving a problem. Python Programming (12 Design object-oriented programs using Python for solving real-CA20FPC202) C122.3 world problems. C122.4 Apply modularity to programs. Use object-oriented approach for solving problems and C123.1 implementing them OOPS through JAVA 13 C123.2 Ability to write Efficient programs that handle exceptions (CA20FPC203) C123.3 Create user friendly interface C124.1 Make use of the concepts of probability and their applications Apply discrete and continuous probability distributions to analyze C124.2 **Probability and Statistics** statistical data. 14 Design the components of a classical hypothesis test for large (MA20FBS201) C124.3 samples. Infer the statistical inferential methods based on small sampling C124.4 tests.

(Autonomous)

Karakambadi Road, Opposite LIC Training Centre, Tirupati – 517 507.

Accredited by NBA (B.Tech – CSE, ECE, EEE, Mech., Civil and IT) & NAAC with 'A' Grade Approved by AICTE, New Delhi permanently affiliated to JNTUA, Ananthapuram.

Utilize the basic characteristic features of a queuing system and C124.5 acquire skills in analyzing queuing models. Define and develop a software project from requirement gathering C125.1 to implementation. Software Engineering (15 C125.2 Ability to code and test the software CA20FPC204) C125.3 Ability to plan, Estimate and Maintain software systems Possess the ability to formulate an efficient problem space for a C126.1 problem expressed in English Possess the ability to select a search algorithm for a problem and C126.2 **Artificial Intelligence** characterize its time and space complexities. 16 (CA20FPC208) Possess the skill for representing knowledge using the C126.3 appropriate technique Possess the ability to apply AI techniques to solve problems of C126.4 Game Playing, Expert Systems and Machine Learning. Ensure the development of applied skills in operating systems C127.1 **Operating Systems Lab** related areas. 17 (CA20FPC210) Able to write software routines modules or implementing various C127.2 concepts of operating system. Use python basic concepts to develop problems to solve C128.1 computational problems. Python Programming Lab Apply lists, dictionaries, sets and functions in python 18 C128.2 (CA20FPC211) programming Experiment module design and text files in python programming C128.4 Solve simple problems using the fundamental syntax and C129.2 semantics of Java Analyze and design Java programs using object-oriented Java Programming Lab C129.3 19 principles (CA20FPC212) C129.4 Develop simple GUI interfaces with event handling capabilities C129.5 Develop and debug java programs using an IDE

20	Design and Analysis of Algorithms (CA20FPC301)	C12A.1	Ability to analyse the performance of algorithms.
		C12A.2	Ability to choose appropriate algorithm design techniques for solving problems.
		C12A.3	Ability to understand how the choice of data structures and the algorithm design methods impact the performance of programs.
21	Data Science & Analytics (CA20FPC302)	C12B.1	Understand business intelligence and business and data analytics.
		C12B.2	To understand the business data analysis through the powerful tools of data application.
		C12B.3	Understand the methods of data mining.
		C12B.4	Apply basic tools (plots, graphs, summary statistics) to carry out EDA.
		C12B.5	Understand the key elements of a data science project
		C12B.6	Identify the appropriate data science technique and/or algorithm to use for the major data science tasks
22	Web Technologies (CA20FPC303)	C211.1	Ability to design websites and do client side validations
		C211.2	Share information over a network
		C211.3	Ability to write server side programs
23	Cloud Computing (CA20FPC304)	C212.1	Understand the concepts of cloud computing and its related techniques.
		C212.2	Provide a pleasant and effective user interface
24	Software Testing (CA20FPC305)	C213.1	Understand the basic testing procedures.
		C213.2	Able to support in generating test cases and test suites.
		C213.3	Able to test the applications manually by applying different testing methods and automation tools.
		C213.4	Apply tools to resolve the problems in Real time environment.
25	Big data Analytics	C214.1	Analyse the big data analytics techniques for useful business application.

Karakambadi Road, Opposite LIC Training Centre, Tirupati – 517 507.

Accredited by NBA (B.Tech – CSE, ECE, EEE, Mech., Civil and IT) & NAAC with 'A' Grade Approved by AICTE, New Delhi permanently affiliated to JNTUA, Ananthapuram.

	(CA20FPC312)	C214.2	Design efficient algorithms for mining the data from large volumes.
		C214.3	Analyse the HADOOP and Map Reduce technologies associated with big data analytics.
		C214.4	Explore on big data applications using Pig and Hive.
26	Design and Analysis of Algorithms Lab(CA20FPC315)	C215.1	Ability to analyse the performance of algorithms.
		C215.2	Ability to choose appropriate algorithm design techniques for solving problems.
		C215.3	Ability to understand how the choice of data structures and the algorithm design methods impact the performance of programs.
	Data Science and Analytics Lab (CA20FPC316)	C216.1	Understand and use appropriate and relevant, fundamental and applied mathematical and statistical knowledge, methodologies and modern computational tools;
27		C216.2	Recognise and use research principles and methods applicable to data science.
		C216.3	Extract an interpretation of data using exploratory data analysis
		C216.4	Visualise and plot graphical representations of data.
	Web Technologies Lab (CA20FPC317)	C217.1	Ability to apply object oriented concepts for programming and its use.
		C217.2	Practical WEB Development using java by using JDBC and ODBC connectivity.
28		C217.3	Implementation of servlets and PHP connectivity by using MYSQL applications.
		C217.4	Learning how to use PHP in different operating systems with different editors like eclipse and net beans.
		C217.5	Acquire skills to develop final project by acquired knowledge during curriculum.
29	Mandatory	C218.1	Students are expected to become more aware of themselves, and their surroundings (family, society, nature)

(Autonomous)

	Course(Universal Human	G210.2	They would become more responsible in life, and in handling
	Values) (CA20FMC318)	C218.2	problems with sustainable solutions, while keeping human relationships and human nature in mind.
		C218.3	They would have better critical ability.
		C218.4	They would also become sensitive to their commitment towards what they have understood (human values, human relationship and human society).
		C218.5	It is hoped that they would be able to apply what they have learnt to their own self in different day-to-day settings in real life, at least a beginning would be made in this direction.

1.1.1 Curricula developed and implemented have relevance to the local, national, regional and global developmental needs which are reflected in Programme Outcomes (POs), Programme Specific Outcomes (PSOs) and Course Outcomes (COs) of the various Programmes offered by the Institution.

In finish of Master of Computer Applications, Student can have wide range of job opportunities to pick up for industry. Software MNCs are the prime recruiters, where web development, data analytics are few areas in high demand for MCA folks. One may also become self employed, by becoming freelancer or independent software developer, software security expert, consultant etc. or Student can take equal part of his/her interest to pursue higher education such as PhD and eventually take up a job in Research and Development sector associated with this field.

Programme Outcomes (POs)

- An ability to apply knowledge of mathematics, computer science and management in practice
- An ability to identify, critically analyse, formulate and develop computer applications
- An ability to select modern computing tools and techniques and use them with dexterity
- An ability to design a computing system to meet desired needs within realistic constraints such as safety, security and applicability
- An ability to devise and conduct experiments, interpret data and provide well informed conclusions
- An ability to understand the impact of system solutions in a contemporary, global,economical, environmental, and societal context for sustainable development.

Programme Specific Outcomes (PSOs)

PSO 1: - Understand, analyze and develop computer programs in the areas related to algorithms, Process and solutions for specific application development using appropriate data modeling concepts.

PSO 2 - Apply standard Software Engineering practices and strategies in software project development using open-source programming environment to deliver quality product for business success.

PSO 3 -Be acquainted with the contemporary issues, latest trends in technological development and thereby innovate new ideas and solutions to existing problems.
